Index of Authors

VOLUME 110 (1999)

Aarts, L.P., see van Dongen, E.P. (110) 1144
Abbruzzese, G., see Trompetto, C. (110) 1106
Abou-Khalil, B., see Fakhoury, T. (110) 1029
Abou-Khalil, B., see Shihabuddin, B. (110) 1452
Abu-Hasaballah, K., see Duckrow, R.B. (110) 2026
Achermann, P., see Roth, C. (110) 632
Achermann, P., see Schwierin, B. (110) 869
Adrien, J.L., see Bruneau, N. (110) 1927
Ahluwalia, B.M.S., see Lambrakis, C.C. (110) 103
Ahmad, T., see Seyal, M. (110) 424
Ajmone-Marsan, C., Obituary: Herbert Henry Jasper M.D., Ph.D. 1906–1999 (110) 1839
Akiyama, T., see Kobayashi, K. (110) 1755
Alahuhta, S., see Rytky, S. (110) 1655
Alarcón, G., see Fernández Torre, J.L. (110) 895
Al-Dayehn, L., see Patel, P. (110) 538
Alho, K., see Cheour, M. (110) 324
Al-Jawayed, I.A., Sabbahi, M., Etnyre, B.R., Hasson, S., The H-reflex modulation in lying and a semi-reclining (sitting) position (110) 2044
Alku, P., Tiitinen, H., Näätänen, R., A method for generating natural-sounding speech stimuli for cognitive brain research (110) 1329
Almeida, R., see Silva, C. (110) 846
Aloisio, A., see Oliveri, M. (110) 806
Altibrandi, M.G., see Pierantozzi, M. (110) 1700
Amodio, P., Marchetti, P., Del Piccolo, F., de Tourtchaninoff, M., Varghese, P., Zuliani, C., Campo, G., Gatta, A., Guérit, J.M., Spectral versus visual EEG analysis in mild hepatic encephalopathy (110) 1334
Andersen, J.B., see Matre, D.A. (110) 2033
Andersen, J.B., see Sinkjær, T. (110) 951
Andersson, G., Ohlin, A., Spatial facilitation of motor evoked responses in monitoring during spinal surgery (110) 720
Androsiuk, W., see Żygierewicz, J. (110) 2136
Angeleri, F., see Pucci, E. (110) 621
Antonini, G., see Uncini, A. (110) 705
Aoki, F., Fetz, E.E., Shupe, L., Lettich, E., Ojemann, G.A., Increased gamma-range activity in human sensorimotor cortex during performance of visuomotor tasks (110) 524
Apkarian, P., see Van 't Ent, D. (110) 1058
Arakawa, K., Tobimatsu, S., Kato, M., Kira, J-i., Parvocellular and magnocellular visual processing in spinocerebellar degeneration and Parkinson's disease: an event-related potential study (110) 1048
Arakawa, K., Tobimatsu, S., Tomoda, H., Kira, J.-i., Kato, M., The effect of spatial frequency on chromatic and achromatic steady-state visual evoked potentials (110) 1959
Arendt-Nielsen, L., see Hansen, P.O. (110) 1290
Arendt-Nielsen, L., see Matre, D.A. (110) 2033
Arolt, V., see Verleger, R. (110) 1175

Index of Subjects

VOLUME 110 (1999)

Abnormal distal motor latency; Carpal tunnel syndrome; Motor fiber involvement; Normal sensory conduction velocity (110) 1471

Absence seizure; EEG; Spike-wave topography; Laplacian map (110) 1568

Absence; Fast discharges; EEG; AED; Prognosis (110) 1029

Accessory nerve; Magnetic stimulation; Excitation site; Coil orientation; Short latency response (110) 1100

Accuracy; TMS; Mapping; MEP; Model (110) 941

Acoustic neurinoma; Brain-stem auditory evoked potentials; Intraoperative monitoring; Hearing preservation; Delayed hearing loss (110) 1935

Adaptation; Auditory evoked potential; Middle-latency auditory evoked potential; Steady-state response; Repetition rate; Rat (110) 62

Adaptive approximations; Matching Pursuit; Sleep spindles; Slow wave activity (110) 2136

Adaptive segmentation; Daytime performance; Drowsiness; Sleep; Automatic analysis; Vigilance test; Obstructive sleep apnea syndrome; Alertness (110) 1499

AED; Absence; Fast discharges; EEG; Prognosis (110) 1029

AEPs; Augmenting/reducing; T complex; Stimulus intensity; Order of stimuli presentation (110) 924

Afterhyperpolarization; Magnetoencephalography; Electroencephalography; Evoked potential; Hippocampus; CA3; Carbachol; Calcium-dependent potassium conductance; Epilepsy (110) 1858

Age factors; Alzheimer's disease; Dementia; Age of onset; EEG; Spectral analysis (110) 621

Age of onset; Alzheimer's disease; Dementia; Age factors; EEG; Spectral analysis (110) 621

Age; Arousal systems; Brain; Electroencephalography; Evoked potentials; Latency; Sex; Wakefulness (110) 1427

Age; Restless legs syndrome; Periodic leg movements in sleep; Sex; Sleep stages (110) 1168

Aging; Coefficient of Variation; Electroencephalogram; Maturation (110) 1399

Aging; Event-related potentials; N2; P3; Attention (110) 564

Aging; Gait disorder; Falls; Sensory evoked potentials (110) 2026

Air stimulation; Input-output relation; Foot motor cortex; Cortical efferent zones; Transcranial magnetic stimulation (110) 1315

Alertness; Daytime performance; Drowsiness; Sleep; Adaptive segmentation; Automatic analysis; Vigilance test; Obstructive sleep apnea syndrome (110) 1499

Alpha activity; EEG inverse problem; Maximum entropy; Sine-cosine diagram; Dipole sources (110) 538

Alpha coma; EEG; Prognosis; Etiology (110) 205

Alpha rhythm; EEG development; Infant EEG; Sensorimotor rhythm; Twins (110) 997

Alpha rhythm; Electroencephalogram; Modelling; Non-linearity; Chaos; Limit cycle; Non-linear prediction (110) 1801

Alpha rhythm; Event related spectral power; Memory; Epilepsy; Prefrontal cortex (110) 676

Alpha rhythm; REM sleep; EEG power spectra; Topography (110) 632

Alpha; Evoked potential; Event-related potential; Wavelet; EEG (110) 643

Alpha; Theta; Neonate; EEG (110) 438

Alzheimer's disease; Dementia; Age of onset; Age factors; EEG; Spectral analysis (110) 621

Alzheimer's disease; Quantitative electroencephalography; Spectral profile (110) 1831

Alzheimer's disease; EEG; Diagnosis (110) 825

Alzheimer's disease; Electroencephalography; Non-linear dynamics; Chaos; Correlation dimension (110) 1159

Alzheimer's disease; magnetoencephalography; Preconscious auditory processing; N100m (110) 1942

Ambulatory cassette-EEG; Video-EEG monitoring; Intractable seizures; Psychogenic seizures (110) 1452

Amplitude asymmetry; Parkinson's disease; Sympathetic skin response; Autonomic nervous system (110) 358

Amplitude threshold; Turns/Amplitude analysis; Interference pattern; Quantitative needle electromyography (110) 1139

Amygdala; Coherence; Classification; Epilepsy network; Hippocampus; Neocortex; Stereo-electroencephalography; Temporal lobe epilepsy (110) 1741

Amyotrophic lateral sclerosis; Motor evoked potential; Magnetic

1388-2457/99/$ - see front matter © 1999 Elsevier Science Ireland Ltd. All rights reserved.
PII: S1388-2457(99)00266-7

brain stimulation; Neurological disease; Myelopathy; Pyramidal sign (110) 1297

Amyotrophic lateral sclerosis; Motor neuron disease; Magnetic stimulation; Central conduction time (110) 975

Amyotrophic lateral sclerosis; Motor units; Twitch characteristics; Macro-potential; Wrist extensor muscles (110) 960

Anaesthesia; EEG; Somatosensory evoked potentials; Burst suppression (110) 1655

Angiofolicullar lymph node hyperplasia; Castleman's disease; Chronic inflammatory demyelinating polyradiculoneuropathy; Electrophysiological studies; Immunosuppresive therapy; Interleukin-6 (110) 1133

Anterior cingulate cortex; Somatosensory evoked potentials; Pain; Supplementary somatosensory area (110) 2107

Anterior temporal electrode; Foramen ovale electrode; Sphenoidal electrode; Epileptiform discharges; Temporal lobe epilepsy; Epilepsy surgery (110) 895

Antiepileptic drugs; Intractability; Developmental delay; Seizures (110) 1245

Apical dendrites; Somatosensory cortex; Consciousness; Neocortex; Cortical circuitry; Touch (110) 1987

Apparent latency; Flicker stimulus; Electroretinogram; Harmonic components; Retinitis pigmentosa; Temporal frequency (110) 1554

Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; ECoG; Experts; Feature extraction; Golden standard; Linear equation; Neural network; On-line detection; Pruning; Spike evaluation; Spike triggered investigation; TEMPLAS; Template matching (110) 887

AR-analysis; Spasms; Coherence; Ictal fast activity (110) 593

Arousal systems; Age; Brain; Electroencephalography; Evoked potentials; Latency; Sex; Wakefulness (110) 1427

Artifact processing; Histogram analysis; Entropy; Polysomnography; Automatic analysis of sleep (110) 2165

Artificial neural networks; Epileptiform discharges; Spikes; Self-organized learning; Fuzzy logic; Bayesian (110) 2049

Artificial; Dipole; Human; Source; Localization (110) 106

Asymmetry; Schizophrenia; P300; Event-related-potentials (110) 1611

Asymptomatic neuropathy; Chronic sensory demyelinating neuropathy; Chronic inflammatory demyelinating neuropathy; Minimal neuropathy (110) 694

Athetosis; Muscle tonus; Neck muscles; Head movements; Nerve block; Surgery (110) 1308

Attention; Childhood cancer; Cognition; Event-related synchronization; Event-related desynchronization; Late-effects; Memory (110) 2064

Attention; Event-related potential; P300; Stimulus-response compatibility; Stroop; Response time (110) 367

Attention; Event-related potentials; Aging; N2; P3 (110) 564

Attention; Event-related potentials; Mismatch negativity; Reliability (110) 317

Attention; Magnetoencephalography; Interaction; Visual stimuli; Auditory stimulus (110) 295

Auditory arousal thresholds; Selective slow wave sleep deprivation; Sleep depth; Slow wave sleep rebound (110) 2148

Auditory cortex; Magnetoencephalography; Auditory evoked responses; Temporal processing; Dipole localisation (110) 856

Auditory cortex; Somatosensory cortex; Vibration; Tactile stimulation; Magnetoencephalography; Human (110) 905

Auditory discrimination; Speech production; Inverse filtering; Speech synthesis; Speech perception; Mismatch negativity (110) 1329

Auditory event-related potentials; Auditory sensory memory; Mismatch negativity; Neural-memory trace; Spectrally complex tones (110) 1388

Auditory evoked potential; Middle-latency auditory evoked potential; Steady-state response; Repetition rate; Adaptation; Rat (110) 62

Auditory evoked potentials; Electroencephalography; Bone conduction; Transcranial magnetic stimulation (110) 1325

Auditory evoked response; Tinnitus; Augmenting/reducing; Serotonin; Frontal cortex; Hyperacusis (110) 666

Auditory evoked responses; Magnetoencephalography; Temporal processing; Dipole localisation; Auditory cortex (110) 856

Auditory evoked responses; Tuberous sclerosis; N100; Mismatch negativity; Autism; Temporal lobe (110) 1825

Auditory modulation; Autism; Mental retardation; Children; Late auditory evoked potentials; N1 wave; T complex; Stimulus intensity (110) 1927

Auditory N100; MMN; MLAEP; BAEP; Coma; Intensive care (110) 1601

Auditory processing; EEG; Event-related desynchronization; Event-related synchronization; Concreteness/abstractness; Semantic memory (110) 1371

Auditory sensory cortex; Evoked potentials; Memory scanning (110) 2086

Auditory sensory memory; Auditory event-related potentials; Mismatch negativity; Neural-memory trace; Spectrally complex tones (110) 1388

Auditory spatial attention; Visual spatial attention; Cross-modal attention; Event-related brain potential (110) 1252

Auditory stimulus; Magnetoencephalography; Interaction; Visual stimuli; Attention (110) 295

Auditory/visual stimuli; P300; P3a; P3b; Event-related potential; Three-stimulus paradigm; Stimulus context (110) 24

Auditory; Cleft lip; Cleft palate; Evoked potentials; Mismatch negativity; Short-term memory (110) 1921

Auditory; Electroencephalogram; EEG; Event-related potential;

ERP; Transcranial magnetic stimulation; Transcranial magnetic stimulation (110) 982

Augmenting/reducing; AEPs; T complex; Stimulus intensity; Order of stimuli presentation (110) 924

Augmenting/reducing; Tinnitus; Auditory evoked response; Serotonin; Frontal cortex; Hyperacusis (110) 666

Autism; Mental retardation; Children; Late auditory evoked potentials; N1 wave; T complex; Auditory modulation; Stimulus intensity (110) 1927

Autism; Tuberous sclerosis; Auditory evoked responses; N100; Mismatch negativity; Temporal lobe (110) 1825

Automatic analysis of sleep; Histogram analysis; Entropy; Polysomnography; Artifact processing (110) 2165

Automatic analysis; Daytime performance; Drowsiness; Sleep; Adaptive segmentation; Vigilance test; Obstructive sleep apnea syndrome; Alertness (110) 1499

Automatic and controlled processes; N400; Lexical decision task; Semantic priming; Visual ERP (110) 813

Automatic data processing; Electroencephalography; Databases; Computer-systems; Medical-records systems; Reference standards (110) 986

Automatic EEG analysis; Wavelet analysis; Seizure detection; Spike detection computational efficiency (110) 239

Automatic processing; Event-related potentials; N300; P300; Smoking cue-reactivity; Tobacco addiction; Deviance detection; Unpleasantness (110) 1570

Automatic spike detection; Approximation; Biosignal analysis; Cross-correlation; ECoG; Experts; Feature extraction; Golden standard; Linear equation; Neural network; On-line detection; Pruning; Spike evaluation; Spike triggered investigation; TEMPLAS; Template matching (110) 887

Autonomic nervous system; Parkinson's disease; Sympathetic skin response; Amplitude asymmetry (110) 358

Axonal polyneuropathy; Conduction velocity; Median nerve; Nerve conduction; Temperature; Tibial nerve (110) 933

BAEP; MMN; Auditory N100; MLAEP; Coma; Intensive care (110) 1601

Band-pass filter; Visual evoked potentials; Optic tract; Near field potentials; Pallidotomy; Potentials (110) 92

Bayesian; Epileptiform discharges; Spikes; Artificial neural networks; Self-organized learning; Fuzzy logic (110) 2049

BECRS; Epilepsy; Sleep; Spectral analysis; Spindle (110) 39

Benign epileptiform variants; Prevalence; Epilepsy; Electroencephalography (110) 280

Bereitschaftspotential; Voluntary movement; Negative slope; Cerebellar dentate nucleus (110) 126

Binding; Evoked potentials; Illusory contours; Kanizsa figures; Phase locking; Wavelet transform (110) 636

Biomagnetism; Pig; Swine; Magnetoencephalography; Electroencephalography; Evoked potential; Evoked magnetic field; Somatosensory cortex; Neuromagnetism (110) 230

Biomagnetism; Swine; Pig; Magnetoencephalography; Somatic evoked potential; Somatic evoked magnetic field; Somatosensory cortex (110) 214

Biosignal analysis; Approximation; Automatic spike detection; Cross-correlation; ECoG; Experts; Feature extraction; Golden standard; Linear equation; Neural network; On-line detection; Pruning; Spike evaluation; Spike triggered investigation; TEMPLAS; Template matching (110) 887

Blink reflex; Magnetic stimulation; Motor inhibition; Supraorbital nerve; Motor evoked response; First dorsal interosseus muscle (110) 1090

Blinking; Centrotemporal spikes; Tapping; Trigeminal system (110) 1995

Bone conduction; Auditory evoked potentials; Electroencephalography; Transcranial magnetic stimulation (110) 1325

Botulinum toxin A; Cervical dystonia; Quantitative electromyography; Sternocleidomastoid muscle (110) 1650

Boundary element method; Magnetoencephalography; Realistic head model; Spherical head model; Dipole localization; Inverse problem (110) 2176

Boundary element method; Median nerve SEP; N30; Gating; Source localization; Current density reconstruction (110) 1589

Brain oscillations; Event-related desynchronization; Event-related synchronization; Sensorimotor function; Voluntary movement (110) 1842

Brain oscillations; Event-related potentials; Single-sweep analysis; Phase-locking; Frontal alpha rhythm; EEG; Cognitive (110) 1784

Brain; Age; Arousal systems; Electroencephalography; Evoked potentials; Latency; Sex; Wakefulness (110) 1427

Brain; Motor imagery; potentials; Eye movement (110) 799

Brain-stem auditory evoked potentials; Acoustic neurinoma; Intraoperative monitoring; Hearing preservation; Delayed hearing loss (110) 1935

Brainstem; Median nerve stimulation; Posterior tibial nerve stimulation; Somatosensory evoked potentials (110) 1458

Bulbocavernosus muscle; Dorsal nerve of the penis; Perineal nerve; Bulbocavernosus reflex (110) 412

Bulbocavernosus reflex; Bulbocavernosus muscle; Dorsal nerve of the penis; Perineal nerve (110) 412

Burst suppression; EEG; Somatosensory evoked potentials; Anaesthesia (110) 1655

Burst suppression; Pentobarbital; Corpus callosum (110) 103

Burst suppression; Pentobarbital; Corpus callosum; Status epilepticus (110) 1037

Burst-suppression; Electroencephalogram; Full-term newborn; Constantly discontinuous EEG pattern; Neonatal hypoxic-ischaemic encephalopathy (110) 1510

CA3; Magnetoencephalography; Electroencephalography; Evoked potential; Hippocampus; Carbachol; Calcium-dependent potassium conductance; Afterhyperpolarization; Epilepsy (110) 1858

Calcium-dependent potassium conductance; Magnetoencephalography; Electroencephalography; Evoked potential; Hippocampus; CA3; Carbachol; Afterhyperpolarization; Epilepsy (110) 1858

CAP Detector; Microstructure Analysis; Cyclic alternating pattern; Sleep EEG (110) 585

Carbachol; Magnetoencephalography; Electroencephalography; Evoked potential; Hippocampus; CA3; Calcium-dependent potassium conductance; Afterhyperpolarization; Epilepsy (110) 1858

Carotid endarterectomy; Intraoperative EEG monitoring; Quantitative EEG; Spectral analysis; Cerebral ischemia (110) 286

Carpal tunnel syndrome; Hand-arm vibration syndrome; Neural conduction; Neuropathy (110) 1276

Carpal tunnel syndrome; Motor fiber involvement; Abnormal distal motor latency; Normal sensory conduction velocity (110) 1471

Carpal tunnel syndrome; Nerve conduction; Electromyography; Palmar conduction (110) 1462

Carpal tunnel syndrome; Sensory innervation; Innervation variability; Ring finger; Nerve conduction studies (110) 1492

Castleman's disease; Angiofolicullar lymph node hyperplasia; Chronic inflammatory demyelinating polyradiculoneuropathy; Electrophysiological studies; Immunosuppresive therapy; Interleukin-6 (110) 1133

Cat; Evoked potential; Spinal cord; Chronic compression; Dorsal column (110) 305

Central conduction time; Motor neuron disease; Amyotrophic lateral sclerosis; Magnetic stimulation (110) 975

Central conduction; Somatosensory evoked potential; Median nerve stimulation; Onset to onset measurement; Peak to peak measurement; Multiple regression analysis (110) 2094

Central motor conduction time; Transcranial magnetic stimulation; Topography; Developmental change (110) 1646

Central oscillator; Tremor; EEG; Visual evoked response; Motor control (110) 2020

Central sulcus; Intracranial event-related potentials; Laterality; Vision; Motor (110) 1210

Centrotemporal spikes; Blinking; Tapping; Trigeminal system (110) 1995

Cerebellar dentate nucleus; Voluntary movement; Bereitschaftspotential; Negative slope (110) 126

Cerebral ischemia; Carotid endarterectomy; Intraoperative EEG monitoring; Quantitative EEG; Spectral analysis (110) 286

Cervical dystonia; Botulinum toxin A; Quantitative electromyography; Sternocleidomastoid muscle (110) 1650

Chaos; Alzheimer's disease; Electroencephalography; Non-linear dynamics; Correlation dimension (110) 1159

Chaos; Electroencephalogram; Alpha rhythm; Modelling; Non-linearity; Limit cycle; Non-linear prediction (110) 1801

Childhood cancer; Attention; Cognition; Event-related synchronization; Event-related desynchronization; Late-effects; Memory (110) 2064

Children; Autism; Mental retardation; Late auditory evoked potentials; N1 wave; T complex; Auditory modulation; Stimulus intensity (110) 1927

Chromatic contrast; Parvocellular; Koniocellular; Magnocellular; Luminance contrast; VEPs (110) 772

Chronic compression; Evoked potential; Spinal cord; Dorsal column; Cat (110) 305

Chronic fatigue syndrome; Transcranial magnetic stimulation; Fatigue; Perception of effort (110) 1883

Chronic inflammatory demyelinating neuropathy; Chronic sensory demyelinating neuropathy; Minimal neuropathy; Asymptomatic neuropathy (110) 694

Chronic inflammatory demyelinating polyneuropathy; Diabetic polyneuropathy; Motor nerve conductions; Pathology (110) 705

Chronic inflammatory demyelinating polyradiculoneuropathy; Castleman's disease; Angiofolicullar lymph node hyperplasia; Electrophysiological studies; Immunosuppresive therapy; Interleukin-6 (110) 1133

Chronic sensory demyelinating neuropathy; Chronic inflammatory demyelinating neuropathy; Minimal neuropathy; Asymptomatic neuropathy (110) 694

Classification; Amygdala; Coherence; Epilepsy network; Hippocampus; Neocortex; Stereo-electroencephalography; Temporal lobe epilepsy (110) 1741

Classification; Hemifield pattern-reversal visual evoked potential; Single trial; Dynamic neural network; Time-varying weights (110) 1978

Cleft lip; Auditory; Cleft palate; Evoked potentials; Mismatch negativity; Short-term memory (110) 1921

Cleft palate; Auditory; Cleft lip; Evoked potentials; Mismatch negativity; Short-term memory (110) 1921

Cleft palate; Event-related potentials; Mismatch negativity; Newborn (110) 324

Clustering; Electroencephalography; Spike detection; Computer; Neural network (110) 404

CMAP facilitation; I-waves; Paired magnetic stimuli; Multiple sclerosis (110) 712

CNV; Writer's cramp; Motor subroutine; Dystonia; Pathophysiology (110) 508

CO_2-laser evoked potentials; Pain; Intracerebral recordings; Stereo-EEG; Somatosensory cortex; Second somatosensory area (SII); Insula; Human brain (110) 133

Coefficient of Variation; Aging; Electroencephalogram; Maturation (110) 1399

Cognition; Attention; Childhood cancer; Event-related synchronization; Event-related desynchronization; Late-effects; Memory (110) 2064

Cognitive processing; Event-related potential; Oddball paradigm; Sleep (110) 53

Cognitive state; Coherence; Volume conduction; Spline-Laplacian; Dura image; Sleep (110) 469

Cognitive; Brain oscillations; Event-related potentials; Single-sweep analysis; Phase-locking; Frontal alpha rhythm; EEG (110) 1784

Coherence analysis; Flexor spasms; Video telemetry; Digital EEG; Secondary bilateral synchrony (110) 374

Coherence analysis; Tremor; EMG correlation analysis; Orthostatic tremor (110) 1774

Coherence; Amygdala; Classification; Epilepsy network; Hippocampus; Neocortex; Stereo-electroencephalography; Temporal lobe epilepsy (110) 1741

Coherence; Cognitive state; Volume conduction; Spline-Laplacian; Dura image; Sleep (110) 469

Coherence; Current source density; EEG; EMG (110) 1892

Coherence; EEG; Synchrony; Spatial (110) 115

Coherence; Estimation; Confidence intervals; Power analysis; Quantitative EEG (110) 1717

Coherence; Neocortical dynamics; Electroencephalogram; Laplacian; Cortical development (110) 1351

Coherence; Spasms; AR-analysis; Ictal fast activity (110) 593

Coil orientation; Magnetic stimulation; Accessory nerve; Excitation site; Short latency response (110) 1100

Color and luminance; Pattern visual evoked potentials; Steady-state; Harmonic components; Spatial frequency (110) 1959

Color and motion perception; Spinocerebellar degeneration; Parkinson's disease; Parallel visual pathways; Event-related potentials (110) 1048

Coma; Consciousness; Event-related potentials; Oddball paradigm; P300; Psychophysiology (110) 1260

Coma; MMN; Auditory N100; MLAEP; BAEP; Intensive care (110) 1601

Common spatial subspace decomposition; Magnetoencephalography/electroencephalography; Evoked responses; Multiple cognitive tasks; Spatio-temporal dipole model; Covariance matrix analysis (110) 604

Compartmentalization; Condyle; Jaw movement; Computer tomography; Electromyography; Lateral pterygoid muscle (110) 944

Computer modeling; Intracellular action potential; Single muscle fiber; Volume conduction; Needle electromyography (110) 166

Computer tomography; Condyle; Jaw movement; Electromyography; Lateral pterygoid muscle; Compartmentalization (110) 944

Computer; Electroencephalography; Spike detection; Neural network; Clustering (110) 404

Computer-systems; Electroencephalography; Databases; Medical-records systems; Reference standards; Automatic data processing (110) 986

Concentric needle electromyography; Mitochondrial cytopathies; Single fiber electromyography; Nerve conduction studies (110) 1284

Concentric needle EMG; Electromyography; Macro-EMG; Mitochondriopathy; Fibre density; Diagnosis (110) 1466

Concentric needle EMG; Macro EMG; Poliomyelitis; Reinnervation (110) 1900

Concreteness/abstractness; EEG; Event-related desynchronization; Event-related synchronization; Auditory processing; Semantic memory (110) 1371

Conditioning; Transcranial magnetic stimulation; Motor evoked potentials; Jendrassik maneuver; Facilitation; Thalamic infarction (110) 499

Conduction block; Temporal dispersion; Motor nerve conduction; Polyneuropathy; Diagnosis (110) 740

Conduction velocity; Axonal polyneuropathy; Median nerve; Nerve conduction; Temperature; Tibial nerve (110) 933

Condyle; Jaw movement; Computer tomography; Electromyography; Lateral pterygoid muscle; Compartmentalization (110) 944

Confidence intervals; Coherence; Estimation; Power analysis; Quantitative EEG (110) 1717

Consciousness; Coma; Event-related potentials; Oddball paradigm; P300; Psychophysiology (110) 1260

Consciousness; Event related potentials; P300; REM sleep; non-REM sleep (110) 1345

Consciousness; Somatosensory cortex; Neocortex; Cortical circuitry; Apical dendrites; Touch (110) 1987

Constantly discontinuous EEG pattern; Electroencephalogram; Full-term newborn; Burst-suppression; Neonatal hypoxic-ischaemic encephalopathy (110) 1510

Contingent negative variation; Motor evoked potential; Cortical silent period; Magnetic cortical stimulation (110) 1394

Contingent negative variation; Schizophrenia; Event-related potentials; Post-imperative negative variation; Parkinson's disease (110) 1175

Continuous performance test; Electrophysiology; Evoked potentials; Spatial analysis; NoGo-anteriorisation; Microstates (110) 833

Contrast sensitivity; Pituitary adenoma; Magnocellular pathway; Parvocellular pathway (110) 876

Coordination; Kinematics; Multi-directional movement; Isogony principle (110) 757

Corpus callosum; Burst suppression; Pentobarbital (110) 103

Corpus callosum; Focal transcranial magnetic cortex stimulation; Transcallosal inhibition; Multiple sclerosis (110) 748

Corpus callosum; Interhemispheric transfer; Visual evoked potential; Frequency analysis; Healthy subject (110) 71

Corpus callosum; Pentobarbital; Burst suppression; Status epilepticus (110) 1037

Correlation dimension; Alzheimer's disease; Electroencephalography; Non-linear dynamics; Chaos (110) 1159

Cortical activation; EEG; Event-related potentials; N100; Information processing; Reaction time; Signal-to-noise ratio; Stochastic resonance (110) 1193

Cortical circuitry; Somatosensory cortex; Consciousness; Neocortex; Apical dendrites; Touch (110) 1987

Cortical development; Neocortical dynamics; Electroencephalogram; Laplacian; Coherence (110) 1351

Cortical efferent zones; Input-output relation; Foot motor cortex; Air stimulation; Transcranial magnetic stimulation (110) 1315

Cortical inhibition; Cortical myoclonus; Cortical stimulation; Motor cortex; Transcranial magnetic stimulation (110) 1521

Cortical inhibition; Human; Motor cortex; Cortical stimulation; Magnetic stimulation (110) 550

Cortical myoclonus; Cortical stimulation; Cortical inhibition; Motor cortex; Transcranial magnetic stimulation (110) 1521

Cortical relay time; Long-latency reflex; Rectified electromyography (110) 1975

Cortical relay time; Long-latency reflexes; Hand muscles; Foot muscles (110) 2014

Cortical representation; Evoked potentials; Magnetoencephalography; Esophagus (110) 1435

Cortical rhythm; Progressive myoclonus epilepsy; Transcranial magnetic stimulation; Intracortical pathway (110) 152

Cortical silent period; Contingent negative variation; Motor evoked potential; Magnetic cortical stimulation (110) 1394

Cortical stimulation; Cortical myoclonus; Cortical inhibition; Motor cortex; Transcranial magnetic stimulation (110) 1521

Cortical stimulation; Human; Motor cortex; Cortical inhibition; Magnetic stimulation (110) 550

Cortico-cortical inhibition; Paired transcranial magnetic stimulation; Motor cortex; Current flow direction; Indirect I waves (110) 1106

Corticospinal excitability; Electromyographic responses; Reading; Transcranial magnetic stimulation (110) 424

Corticospinal tract; Magnetic stimulation; Electrical stimulation; Spastic paraparesis; Motor cortex (110) 1641

Corticospinal; Spinal cord monitoring; Spatial facilitation; Motor evoked responses; Scoliosis surgery (110) 720

Covariance matrix analysis; Magnetoencephalography/electroencephalography; Evoked responses; Multiple cognitive tasks; Spatio-temporal dipole model; Common spatial subspace decomposition (110) 604

Cross-correlation; Approximation; Automatic spike detection; Biosignal analysis; ECoG; Experts; Feature extraction; Golden standard; Linear equation; Neural network; On-line detection; Pruning; Spike evaluation; Spike triggered investigation; TEMPLAS; Template matching (110) 887

Cross-modal attention; Visual spatial attention; Auditory spatial attention; Event-related brain potential (110) 1252

Current density reconstruction; Median nerve SEP; N30; Gating; Source localization; Boundary element method (110) 1589

Current flow direction; Paired transcranial magnetic stimulation; Cortico-cortical inhibition; Motor cortex; Indirect I waves (110) 1106

Current source density; Coherence; EEG; EMG (110) 1892

Current source density; Oscillations; Gamma rhythm; 40 Hz; Potential field; Interneurons (110) 660

Curve fitting; Simulation; Distal latencies; Frequency distribution; Median nerve (110) 556

Cyclic alternating pattern; CAP Detector; Microstructure Analysis; Sleep EEG (110) 585

Databases; Electroencephalography; Computer-systems; Medical-records systems; Reference standards; Automatic data processing (110) 986

Daytime performance; Drowsiness; Sleep; Adaptive segmentation; Automatic analysis; Vigilance test; Obstructive sleep apnea syndrome; Alertness (110) 1499

Daytime sleepiness; Nap; Post-lunch dip; Performance; Vigilance; EEG alpha activity (110) 272

Deep brain stimulation; Parkinson's disease; Somatosensory evoked potentials; Supplementary motor area (110) 1700

Delayed hearing loss; Acoustic neurinoma; Brain-stem auditory evoked potentials; Intraoperative monitoring; Hearing preservation (110) 1935

Dementia; Alzheimer's disease; Age of onset; Age factors; EEG; Spectral analysis (110) 621

Dementia; Down's syndrome; Olfactory; Olfactory event-related potential (110) 1563

Development; Face processing; Event-related potentials (110) 910

Developmental change; Transcranial magnetic stimulation; Central motor conduction time; Topography (110) 1646

Developmental delay; Intractability; Antiepileptic drugs; Seizures (110) 1245

Deviance detection; Event-related potentials; N300; P300; Smoking cue-reactivity; Tobacco addiction; Automatic processing; Unpleasantness (110) 1570

Diabetic polyneuropathy; Chronic inflammatory demyelinating polyneuropathy; Motor nerve conductions; Pathology (110) 705

Diagnosis; Conduction block; Temporal dispersion; Motor nerve conduction; Polyneuropathy (110) 740

Diagnosis; EEG; Alzheimer's disease (110) 825

Diagnosis; Electromyography; Concentric needle EMG; Macro-EMG; Mitochondriopathy; Fibre density (110) 1466

Diagnostic criteria; Electromyography; Nerve conduction; Diagnostic strategies; Neuromuscular disorders; Multicentre EMG database (110) 1814

Diagnostic strategies; Electromyography; Nerve conduction; Diagnostic criteria; Neuromuscular disorders; Multicentre EMG database (110) 1814

Dichotic; Event related potentials; Hemispheric lateralization; Pitch discrimination; Left ear advantage (110) 516

Digital EEG; Coherence analysis; Flexor spasms; Video telemetry; Secondary bilateral synchrony (110) 374

Dimensional complexity; P3-ERP component (110) 31

Dipole localisation; Magnetoencephalography; Auditory evoked responses; Temporal processing; Auditory cortex (110) 856

Dipole localization; Magnetoencephalography; Realistic head model; Spherical head model; Boundary element method; Inverse problem (110) 2176

Dipole localization; Realistic head model; EEG (110) 846

Dipole Modeling; Interictal spikes; Scalp EEG; Intercerebral recordings (110) 1013

Dipole moment; Magnetoencephalography; Somatosensory evoked field; Stimulus intensity; Threshold of muscle twitch (110) 2127

Dipole source analysis; Somatosensory evoked potentials; 600 Hz wavelets; Oscillatory somatosensory evoked potentials; Primary somatosensory cortex; Thalamocortical projection; Median nerve (110) 1659

Dipole source localization; Evoked potentials; EEG inverse problem; Head surface digitization; Electrode positions; 10–20 system (110) 261

Dipole source localization; Retinotopy; Retinotopic map; Visual-evoked potential; Multi-electrode recording; M-sequence; White noise (110) 1793

Dipole sources; Alpha activity; EEG inverse problem; Maximum entropy; Sine-cosine diagram (110) 538

Dipole; Artificial; Human; Source; Localization (110) 106

Dipole; Superconducting quantum interference device; Magnetic field; Electromyogram; Motor unit (110) 284

Discharge frequency; Periodicity; Lateralized epileptiform discharges; Discharge morphology (110) 1516

Discharge morphology; Periodicity; Lateralized epileptiform discharges; Discharge frequency (110) 1516

Distal latencies; Curve fitting; Simulation; Frequency distribution; Median nerve (110) 556

Distal-proximal representation; Human; Somatosensory evoked magnetic fields; Somatosensory cortex; Index finger; Palm (110) 430

Dopamine antagonists; Pattern electroretinogram; Retina; Human; Parkinson's disease (110) 82

Dopamine; Parkinsons disease; Nigrostriatal neurones (110) 2006

Dorsal column; Evoked potential; Spinal cord; Chronic compression; Cat (110) 305

Dorsal nerve of the penis; Bulbocavernosus muscle; Perineal nerve; Bulbocavernosus reflex (110) 412

Down's syndrome; Dementia; Olfactory; Olfactory event-related potential (110) 1563

Drowsiness; Daytime performance; Sleep; Adaptive segmentation; Automatic analysis; Vigilance test; Obstructive sleep apnea syndrome; Alertness (110) 1499

Dura image; Coherence; Cognitive state; Volume conduction; Spline-Laplacian; Sleep (110) 469

Dynamic neural network; Hemifield pattern-reversal visual evoked potential; Single trial; Time-varying weights; Classification (110) 1978

Dystonia; CNV; Writer's cramp; Motor subroutine; Pathophysiology (110) 508

Early activity; EEG; MEG; Verbal memory performance (110) 1378

ECoG; Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; Experts; Feature extraction; Golden standard; Linear equation; Neural network; On-line detection; Pruning; Spike evaluation; Spike triggered investigation; TEMPLAS; Template matching (110) 887

Edges; Visual evoked potentials; Textures; Segregation; Filling-in (110) 86

EEG alpha activity; Nap; Post-lunch dip; Daytime sleepiness; Performance; Vigilance (110) 272

EEG automatic analysis; Hepatic encephalopathy; EEG spectral analysis; EEG; Psychometic alterations (110) 1334

EEG average reference; EEG reference; High resolution EEG; Evoked potentials; Signal to noise ratio; Standard deviation (110) 1149

EEG classification; Mu rhythm; Voluntary movement; Sensorimotor cortex; Human; Event-related desynchronization (110) 787

EEG development; Infant EEG; Alpha rhythm; Sensorimotor rhythm; Twins (110) 997

EEG inverse problem; Alpha activity; Maximum entropy; Sine-cosine diagram; Dipole sources (110) 538

EEG inverse problem; Evoked potentials; Dipole source localization; Head surface digitization; Electrode positions; 10–20 system (110) 261

EEG power spectra; REM sleep; Alpha rhythm; Topography (110) 632

EEG reference; EEG average reference; High resolution EEG;

Evoked potentials; Signal to noise ratio; Standard deviation (110) 1149

EEG spectral analysis; Hepatic encephalopathy; EEG automatic analysis; EEG; Psychometic alterations (110) 1334

EEG; Absence seizure; Spike-wave topography; Laplacian map (110) 1568

EEG; Absence; Fast discharges; AED; Prognosis (110) 1029

EEG; Alpha coma; Prognosis; Etiology (110) 205

EEG; Alpha; Theta; Neonate (110) 438

EEG; Alzheimer's disease; Dementia; Age of onset; Age factors; Spectral analysis (110) 621

EEG; Alzheimer's disease; Diagnosis (110) 825

EEG; Auditory; Electroencephalogram; Event-related potential; ERP; Transcranial magnetic stimulation; Transcranial magnetic stimulation (110) 982

EEG; Brain oscillations; Event-related potentials; Single-sweep analysis; Phase-locking; Frontal alpha rhythm; Cognitive (110) 1784

EEG; Coherence; Current source density; EMG (110) 1892

EEG; Coherence; Synchrony; Spatial (110) 115

EEG; Electrode cap; MRI; Functional MRI (110) 2189

EEG; Emotion; Valence; Gamma band; Hemisphere asymmetry (110) 1913

EEG; Epidural electrodes; Epilepsy; Subdural electrodes (110) 419

EEG; Epilepsy; In vitro; Turtle brain (110) 1535

EEG; Epileptiform discharge; Independent component analysis; Principal component analysis (110) 1755

EEG; Event-related desynchronization; Event-related synchronization; Auditory processing; Concreteness/abstractness; Semantic memory (110) 1371

EEG; Event-related potentials; N100; Information processing; Reaction time; Cortical activation; Signal-to-noise ratio; Stochastic resonance (110) 1193

EEG; Evoked potential; Event-related potential; Wavelet; Alpha (110) 643

EEG; Hepatic encephalopathy; EEG spectral analysis; EEG automatic analysis; Psychometic alterations (110) 1334

EEG; MEG; Verbal memory performance; Early activity (110) 1378

EEG; Neonatal hypoxic-ischemic encephalopathy; Outcome (110) 655

EEG; Non-stationary processes; Seizures; Time series analysis; Time-varying autoregressive modeling (110) 2197

EEG; Quantitative topographical; FDG-PET; Vascular dementia; Frequency bands; Thalamus (110) 615

EEG; Realistic head model; Dipole localization (110) 846

EEG; Somatosensory evoked potentials; Burst suppression; Anaesthesia (110) 1655

EEG; Tremor; Visual evoked response; Central oscillator; Motor control (110) 2020

Electrical stimulation; Exteroceptive suppression; Trigeminal reflex; Nociception; Masticatory muscles; Motor physiology (110) 1290

Electrical stimulation; Magnetic stimulation; Corticospinal tract; Spastic paraparesis; Motor cortex (110) 1641

Electrocorticogram; Oscillation; Gamma; Sensorimotor cortex; Visuomotor task; Human (110) 524

Electrode cap; EEG; MRI; Functional MRI (110) 2189

Electrode positions; Evoked potentials; EEG inverse problem; Dipole source localization; Head surface digitization; 10–20 system (110) 261

Electroencephalogram; Aging; Coefficient of Variation; Maturation (110) 1399

Electroencephalogram; Alpha rhythm; Modelling; Non-linearity; Chaos; Limit cycle; Non-linear prediction (110) 1801

Electroencephalogram; Auditory; EEG; Event-related potential; ERP; Transcranial magnetic stimulation; Transcranial magnetic stimulation (110) 982

Electroencephalogram; Full-term newborn; Constantly discontinuous EEG pattern; Burst-suppression; Neonatal hypoxic-ischaemic encephalopathy (110) 1510

Electroencephalogram; Neocortical dynamics; Laplacian; Coherence; Cortical development (110) 1351

Electroencephalogram; Rat; Sleep; Sleep Regulation; Spectral analysis (110) 869

Electroencephalography; Age; Arousal systems; Brain; Evoked potentials; Latency; Sex; Wakefulness (110) 1427

Electroencephalography; Alzheimer's disease; Non-linear dynamics; Chaos; Correlation dimension (110) 1159

Electroencephalography; Auditory evoked potentials; Bone conduction; Transcranial magnetic stimulation (110) 1325

Electroencephalography; Benign epileptiform variants; Prevalence; Epilepsy (110) 280

Electroencephalography; Databases; Computer-systems; Medical-records systems; Reference standards; Automatic data processing (110) 986

Electroencephalography; Epilepsy management (110) 1671

Electroencephalography; Human; Sleep; Insomnia; Sedative; Nonbarbiturate; Substance withdrawal syndrome (110) 1965

Electroencephalography; Magnetoencephalography; Evoked potential; Hippocampus; CA3; Carbachol; Calcium-dependent potassium conductance; Afterhyperpolarization; Epilepsy (110) 1858

Electroencephalography; Pig; Swine; Magnetoencephalography; Biomagnetism; Evoked potential; Evoked magnetic field; Somatosensory cortex; Neuromagnetism (110) 230

Electroencephalography; Spike detection; Computer; Neural network; Clustering (110) 404

Electromyogram; Magnetic field; Superconducting quantum interference device; Motor unit; Dipole (110) 284

Electromyographic responses; Corticospinal excitability; Reading; Transcranial magnetic stimulation (110) 424

Electromyography; Concentric needle EMG; Macro-EMG; Mitochondriopathy; Fibre density; Diagnosis (110) 1466

Electromyography; Condyle; Jaw movement; Computer tomography; Lateral pterygoid muscle; Compartmentalization (110) 944

Electromyography; Motor control; Pattern of movement; Postural activity; Postural adjustment; Sit-to-stand (110) 1634

Electromyography; Nerve conduction; Carpal tunnel syndrome; Palmar conduction (110) 1462

Electromyography; Nerve conduction; Diagnostic strategies; Diagnostic criteria; Neuromuscular disorders; Multicentre EMG database (110) 1814

Electromyography; Peripheral nervous system disease; Peripheral neuropathy; Sensory neuropathy; Sensory testing; Quantitative sudomotor axon reflex testing (110) 1909

Electromyography; Surface electromyography; Reliability; Muscle fatigue; Muscle torque (110) 725

Electrophysiological studies; Castleman's disease; Angiofolicullar lymph node hyperplasia; Chronic inflammatory demyelinating polyradiculoneuropathy; Immunosuppresive therapy; Interleukin-6 (110) 1133

Electrophysiology; Continuous performance test; Evoked potentials; Spatial analysis; NoGo-anteriorisation; Microstates (110) 833

Electroretinogram; Apparent latency; Flicker stimulus; Harmonic components; Retinitis pigmentosa; Temporal frequency (110) 1554

EMG; H-reflex; Methods; Recovery curve (110) 2044

EMG correlation analysis; Tremor; Coherence analysis; Orthostatic tremor (110) 1774

EMG signal decomposition; Firing rate; Force generation; Motor unit activation (110) 1270

EMG; Coherence; Current source density; EEG (110) 1892

Emotion; Valence; EEG; Gamma band; Hemisphere asymmetry (110) 1913

Entropy; Histogram analysis; Polysomnography; Artifact processing; Automatic analysis of sleep (110) 2165

Epidural electrodes; EEG; Epilepsy; Subdural electrodes (110) 419

Epilepsy management; Electroencephalography (110) 1671

Epilepsy network; Amygdala; Coherence; Classification; Hippocampus; Neocortex; Stereo-electroencephalography; Temporal lobe epilepsy (110) 1741

Epilepsy surgery; Anterior temporal electrode; Foramen ovale electrode; Sphenoidal electrode; Epileptiform discharges; Temporal lobe epilepsy (110) 895

Epilepsy; BECRS; Sleep; Spectral analysis; Spindle (110) 39

Epilepsy; Benign epileptiform variants; Prevalence; Electroencephalography (110) 280

Epilepsy; EEG; Epidural electrodes; Subdural electrodes (110) 419

Epilepsy; EEG; In vitro; Turtle brain (110) 1535

Epilepsy; Event related spectral power; Memory; Alpha rhythm; Prefrontal cortex (110) 676

Epilepsy; Ictal; Source localization; Frequency analysis (110) 176

Epilepsy; Magnetoencephalography; Electroencephalography; Evoked potential; Hippocampus; CA3; Carbachol; Calcium-dependent potassium conductance; Afterhyperpolarization (110) 1858

Epilepsy; Outcome prediction; Self-regulation; Slow cortical potentials (110) 683

Epileptiform discharge; EEG; Independent component analysis; Principal component analysis (110) 1755

Epileptiform discharges; Anterior temporal electrode; Foramen ovale electrode; Sphenoidal electrode; Temporal lobe epilepsy; Epilepsy surgery (110) 895

Epileptiform discharges; Sleep spindles; Hippocampus; NREM sleep (110) 687

Epileptiform discharges; Spikes; Artificial neural networks; Self-organized learning; Fuzzy logic; Bayesian (110) 2049

Epworth Sleepiness Scale; Narcolepsy; Hypersomnia; Maintenance of Wakefulness Test; Multiple Sleep Latency Test; Modafinil (110) 2131

ERP; Auditory; Electroencephalogram; EEG; Event-related potential; Transcranial magnetic stimulation; Transcranial magnetic stimulation (110) 982

Error processing; Reaction time; Event-related brain potential; Spatial S-R compatibility tasks (110) 342

Error related negativity; Saccadic eye movement; Finger movement; Go/NoGo task; P300; N2 (110) 1058

Esophagus; Evoked potentials; Magnetoencephalography; Cortical representation (110) 1435

Estimation; Coherence; Confidence intervals; Power analysis; Quantitative EEG (110) 1717

Etiology; Alpha coma; EEG; Prognosis (110) 205

Event related potentials; Dichotic; Hemispheric lateralization; Pitch discrimination; Left ear advantage (110) 516

Event related potentials; P300; REM sleep; non-REM sleep; Consciousness (110) 1345

Event related spectral power; Memory; Epilepsy; Alpha rhythm; Prefrontal cortex (110) 676

Event-related brain potential; Reaction time; Error processing; Spatial S-R compatibility tasks (110) 342

Event-related brain potential; Visual spatial attention; Auditory spatial attention; Cross-modal attention (110) 1252

Event-related desynchronization; Attention; Childhood cancer; Cognition; Event-related synchronization; Late-effects; Memory (110) 2064

Event-related desynchronization; EEG classification; Mu rhythm; Voluntary movement; Sensorimotor cortex; Human (110) 787

Event-related desynchronization; EEG; Event-related synchronization; Auditory processing; Concreteness/abstractness; Semantic memory (110) 1371

Event-related desynchronization; Event-related synchronization; Sensorimotor function; Voluntary movement; Brain oscillations (110) 1842

Event-related desynchronization; Slow potentials; Stimulus anticipation; Motor preparation (110) 250

Event-related potential; Attention; P300; Stimulus-response compatibility; Stroop; Response time (110) 367

Event-related potential; Auditory; Electroencephalogram; EEG; ERP; Transcranial magnetic stimulation; Transcranial magnetic stimulation (110) 982

Event-related potential; Cognitive processing; Oddball paradigm; Sleep (110) 53

Event-related potential; Evoked potential; Wavelet; Alpha; EEG (110) 643

Event-related potential; Gamma; Reaction time; Evoked; Single trial (110) 158

Event-related potential; P300; Modality; Three stimulus; Topography (110) 463

Event-related potential; P300; P3a; P3b; Auditory/visual stimuli; Three-stimulus paradigm; Stimulus context (110) 24

Event-related potential; Visual-spatial attention; Selection negativity; Kinetic form; Low resolution electromagnetic tomography (110) 329

Event-related potentials; Aging; N2; P3; Attention (110) 564

Event-related potentials; Brain oscillations; Single-sweep analysis; Phase-locking; Frontal alpha rhythm; EEG; Cognitive (110) 1784

Event-related potentials; Cleft palate; Mismatch negativity; Newborn (110) 324

Event-related potentials; Color and motion perception; Spinocerebellar degeneration; Parkinson's disease; Parallel visual pathways (110) 1048

Event-related potentials; Coma; Consciousness; Oddball paradigm; P300; Psychophysiology (110) 1260

Event-related potentials; EEG; N100; Information processing; Reaction time; Cortical activation; Signal-to-noise ratio; Stochastic resonance (110) 1193

Event-related potentials; Face processing; Development (110) 910

Event-related potentials; Face processing; Source location; Vertex positivity; Single subject analysis (110) 449

Event-related potentials; Mismatch negativity; Reliability; Attention (110) 317

Event-related potentials; N300; P300; Smoking cue-reactivity; Tobacco addiction; Deviance detection; Automatic processing; Unpleasantness (110) 1570

Event-related potentials; P300; Sleep; Subject's own name; K-complex (110) 2153

Event-related potentials; Schizophrenia; Contingent negative variation; Post-imperative negative variation; Parkinson's disease (110) 1175

Event-related potentials; Stroop task; Frontal and parietal area of the cortex; Hemispheres; Instantaneous EEG coherence (110) 1410

Event-related synchronization; Attention; Childhood cancer; Cognition; Event-related desynchronization; Late-effects; Memory (110) 2064

Event-related synchronization; EEG; Event-related desynchronization; Auditory processing; Concreteness/abstractness; Semantic memory (110) 1371

Event-related synchronization; Event-related desynchronization; Sensorimotor function; Voluntary movement; Brain oscillations (110) 1842

Event-related-potentials; Schizophrenia; P300; Asymmetry (110) 1611

Evoked; Gamma; Reaction time; Single trial; Event-related potential (110) 158

Evoked magnetic field; Pig; Swine; Magnetoencephalography; Electroencephalography; Biomagnetism; Evoked potential; Somatosensory cortex; Neuromagnetism (110) 230

Evoked magnetic fields; Somatosensory evoked magnetic field; Somatosensory cortex; Stroke (110) 916

Evoked potential; Event-related potential; Wavelet; Alpha; EEG (110) 643

Evoked potential; Magnetoencephalography; Electroencephalography; Hippocampus; CA3; Carbachol; Calcium-dependent potassium conductance; Afterhyperpolarization; Epilepsy (110) 1858

Evoked potential; Pig; Swine; Magnetoencephalography; Electroencephalography; Biomagnetism; Evoked magnetic field; Somatosensory cortex; Neuromagnetism (110) 230

Evoked potential; Spinal cord; Chronic compression; Dorsal column; Cat (110) 305

Evoked potentials; Age; Arousal systems; Brain; Electroencephalography; Latency; Sex; Wakefulness (110) 1427

Evoked potentials; Auditory; Cleft lip; Cleft palate; Mismatch negativity; Short-term memory (110) 1921

Evoked potentials; Binding; Illusory contours; Kanizsa figures; Phase locking; Wavelet transform (110) 636

Evoked potentials; Continuous performance test; Electrophysiol-

ogy; Spatial analysis; NoGo-anteriorisation; Microstates (110) 833

Evoked potentials; EEG inverse problem; Dipole source localization; Head surface digitization; Electrode positions; 10–20 system (110) 261

Evoked potentials; EEG reference; EEG average reference; High resolution EEG; Signal to noise ratio; Standard deviation (110) 1149

Evoked potentials; Magnetoencephalography; Esophagus; Cortical representation (110) 1435

Evoked potentials; Memory scanning; Auditory sensory cortex (110) 2086

Evoked potentials; Modafinil; Narcolepsy; P300; Predictive value of tests; Treatment outcome (110) 1041

Evoked potentials; Premature infant; Nerve conduction velocity; Polyunsaturated fatty acids (110) 1363

Evoked potentials; Retinal prosthesis; Photoreceptor degeneration (110) 1545

Evoked responses; Magnetoencephalography/electroencephalography; Multiple cognitive tasks; Spatio-temporal dipole model; Common spatial subspace decomposition; Covariance matrix analysis (110) 604

Excessive daytime sleepiness; Narcolepsy; Nocturnal sleep; MSLT (110) 1531

Excitability; Strength–duration time constant; Rheobase; Voltage-dependence; Motor axons (110) 1618

Excitation site; Magnetic stimulation; Accessory nerve; Coil orientation; Short latency response (110) 1100

Experimental muscle pain; Stretch reflex; Motor control; Walking; Soleus muscle (110) 2033

Experts; Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; ECoG; Feature extraction; Golden standard; Linear equation; Neural network; On-line detection; Pruning; Spike evaluation; Spike triggered investigation; TEMPLAS; Template matching (110) 887

External anal sphincter muscle; Needle electromyography; Standardisation; Low and high threshold motor units; Motor unit potentials (110) 1488

Exteroceptive suppression; Trigeminal reflex; Nociception; Electrical stimulation; Masticatory muscles; Motor physiology (110) 1290

Eye movement; Motor imagery; Brain; potentials (110) 799

Face processing; Development; Event-related potentials (110) 910

Face processing; Event-related potentials; Source location; Vertex positivity; Single subject analysis (110) 449

Facilitation; Transcranial magnetic stimulation; Motor evoked potentials; Conditioning; Jendrassik maneuver; Thalamic infarction (110) 499

Falls; Gait disorder; Aging; Sensory evoked potentials (110) 2026

Far-field potential; Motor unit action potential; Motor unit; Intracellular action potential; Volume conduction (110) 1876

Far-field; Somatosensory evoked potentials; Intra-individual variability; Median nerve; Repeat reliability (110) 1664

Fast discharges; Absence; EEG; AED; Prognosis (110) 1029

Fatigue; Chronic fatigue syndrome; Transcranial magnetic stimulation; Perception of effort (110) 1883

F-chronodispersion; Thalidomide; Motor neuropathy (110) 735

FDG-PET; Quantitative topographical; EEG; Vascular dementia; Frequency bands; Thalamus (110) 615

Feature extraction; Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; ECoG; Experts; Golden standard; Linear equation; Neural network; On-line detection; Pruning; Spike evaluation; Spike triggered investigation; TEMPLAS; Template matching (110) 887

Fibre density; Electromyography; Concentric needle EMG; Macro-EMG; Mitochondriopathy; Diagnosis (110) 1466

Filling-in; Visual evoked potentials; Textures; Segregation; Edges (110) 86

Finger movement; Saccadic eye movement; Go/NoGo task; P300; N2; Error related negativity (110) 1058

Firing rate; Force generation; Motor unit activation; EMG signal decomposition (110) 1270

Firing rate; Muscular dystrophy; Motoneuron; Motor unit; Motor unit recruitment (110) 1111

First dorsal interosseus muscle; Magnetic stimulation; Motor inhibition; Supraorbital nerve; Motor evoked response; Blink reflex (110) 1090

Flexor spasms; Coherence analysis; Video telemetry; Digital EEG; Secondary bilateral synchrony (110) 374

Flicker stimulus; Apparent latency; Electroretinogram; Harmonic components; Retinitis pigmentosa; Temporal frequency (110) 1554

Focal transcranial magnetic cortex stimulation; Corpus callosum; Transcallosal inhibition; Multiple sclerosis (110) 748

Foot motor cortex; Input-output relation; Air stimulation; Cortical efferent zones; Transcranial magnetic stimulation (110) 1315

Foot movement; Movement-related cortical potentials; Voluntary muscle relaxation; Negative motor phenomenon; Motor control; Topographic mapping (110) 397

Foot muscles; Long-latency reflexes; Cortical relay time; Hand muscles (110) 2014

Foramen ovale electrode; Anterior temporal electrode; Sphenoidal electrode; Epileptiform discharges; Temporal lobe epilepsy; Epilepsy surgery (110) 895

Force generation; Firing rate; Motor unit activation; EMG signal decomposition (110) 1270

Forearm muscle; Reciprocal inhibition; H-reflex; Spasticity; Test reflex size (110) 2194

Frequency analysis; Epilepsy; Ictal; Source localization (110) 176

Frequency analysis; Interhemispheric transfer; Visual evoked potential; Corpus callosum; Healthy subject (110) 71

Frequency bands; Quantitative topographical; EEG; FDG-PET; Vascular dementia; Thalamus (110) 615

Frequency distribution; Curve fitting; Simulation; Distal latencies; Median nerve (110) 556

Frontal alpha rhythm; Brain oscillations; Event-related potentials; Single-sweep analysis; Phase-locking; EEG; Cognitive (110) 1784

Frontal and parietal area of the cortex; Stroop task; Hemispheres; Event-related potentials; Instantaneous EEG coherence (110) 1410

Frontal cortex; Theta activity; Habituation; Orienting response; Novelty (110) 1204

Frontal cortex; Tinnitus; Auditory evoked response; Augmenting/reducing; Serotonin; Hyperacusis (110) 666

Frontal lobe; Transcranial magnetic stimulation; Speech; Language (110) 1073

Full-term newborn; Electroencephalogram; Constantly discontinuous EEG pattern; Burst-suppression; Neonatal hypoxic-ischaemic encephalopathy (110) 1510

Functional magnetic resonance imaging; Median nerve stimulation; Somatosensory cortex; Motor cortex; Human brain mapping; Somatosensory evoked potential (110) 47

Functional magnetic resonance imaging; Transcranial magnetic stimulation; Hand knob; Motorcortex mapping (110) 699

Functional MRI; Electrode cap; EEG; MRI (110) 2189

Fuzzy logic; Epileptiform discharges; Spikes; Artificial neural networks; Self-organized learning; Bayesian (110) 2049

Gait disorder; Falls; Aging; Sensory evoked potentials (110) 2026

Gamma band; Emotion; Valence; EEG; Hemisphere asymmetry (110) 1913

Gamma rhythm; Oscillations; 40 Hz; Potential field; Current source density; Interneurons (110) 660

Gamma; Oscillation; Electrocorticogram; Sensorimotor cortex; Visuomotor task; Human (110) 524

Gamma; Reaction time; Evoked; Single trial; Event-related potential (110) 158

Gating; Median nerve SEP; N30; Source localization; Current density reconstruction; Boundary element method (110) 1589

Go/NoGo task; Saccadic eye movement; Finger movement; P300; N2; Error related negativity (110) 1058

Golden standard; Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; ECoG; Experts; Feature extraction; Linear equation; Neural network; On-line detection; Pruning; Spike evaluation; Spike triggered investigation; TEMPLAS; Template matching (110) 887

Habituation; Theta activity; Orienting response; Novelty; Frontal cortex (110) 1204

Habituation; Waveform; Sympathetic skin response; Palm; Sole (110) 765

Hand knob; Transcranial magnetic stimulation; Functional magnetic resonance imaging; Motorcortex mapping (110) 699

Hand muscles; Long-latency reflexes; Cortical relay time; Foot muscles (110) 2014

Hand-arm vibration syndrome; Neural conduction; Carpal tunnel syndrome; Neuropathy (110) 1276

Harmonic components; Apparent latency; Flicker stimulus; Electroretinogram; Retinitis pigmentosa; Temporal frequency (110) 1554

Harmonic components; Pattern visual evoked potentials; Steady-state; Spatial frequency; Color and luminance (110) 1959

Head injury; Motor evoked potentials; Somatosensory evoked potentials; Transcranial magnetic stimulation (110) 1080

Head movements; Muscle tonus; Neck muscles; Athetosis; Nerve block; Surgery (110) 1308

Head surface digitization; Evoked potentials; EEG inverse problem; Dipole source localization; Electrode positions; 10–20 system (110) 261

Healthy subject; Interhemispheric transfer; Visual evoked potential; Corpus callosum; Frequency analysis (110) 71

Hearing preservation; Acoustic neurinoma; Brain-stem auditory evoked potentials; Intraoperative monitoring; Delayed hearing loss (110) 1935

Hemifield pattern-reversal visual evoked potential; Single trial; Dynamic neural network; Time-varying weights; Classification (110) 1978

Hemisphere asymmetry; Emotion; Valence; EEG; Gamma band (110) 1913

Hemispheres; Stroop task; Frontal and parietal area of the cortex; Event-related potentials; Instantaneous EEG coherence (110) 1410

Hemispheric lateralization; Event related potentials; Dichotic; Pitch discrimination; Left ear advantage (110) 516

Hepatic encephalopathy; EEG spectral analysis; EEG automatic analysis; EEG; Psychometic alterations (110) 1334

High resolution EEG; EEG reference; EEG average reference; Evoked potentials; Signal to noise ratio; Standard deviation (110) 1149

High-frequency magnetic oscillations; Somatosensory cortex; Posterior tibial nerve; Magnetoencephalography; Time–frequency components; Multiple signal classification algorithm (110) 1585

High-frequency magnetic oscillations; Somatosensory cortex; Primary response (N20m); Inhibitory interneurons; Pyramidal neurons; Interference (110) 1445

High-frequency oscillation; Posterior tibial nerve stimulation; Median nerve stimulation; Primary somatosensory responses (P37 and N20) (110) 1948

High-frequency oscillation; Somatosensory evoked potential; Parkinson's disease; Myoclonus epilepsy (110) 185

Hippocampus; Amygdala; Coherence; Classification; Epilepsy network; Neocortex; Stereo-electroencephalography; Temporal lobe epilepsy (110) 1741

Hippocampus; Magnetoencephalography; Electroencephalography; Evoked potential; CA3; Carbachol; Calcium-dependent potassium conductance; Afterhyperpolarization; Epilepsy (110) 1858

Hippocampus; Sleep spindles; Epileptiform discharges; NREM sleep (110) 687

Histogram analysis; Entropy; Polysomnography; Artifact processing; Automatic analysis of sleep (110) 2165

H-reflex; EMG; Methods; Recovery curve (110) 2044

H-reflex; Reciprocal inhibition; Forearm muscle; Spasticity; Test reflex size (110) 2194

H-reflex; Tendon jerk; Voluntary contraction; Reproducibility (110) 1481

Human brain mapping; Functional magnetic resonance imaging; Median nerve stimulation; Somatosensory cortex; Motor cortex; Somatosensory evoked potential (110) 47

Human brain; Pain; CO_2-laser evoked potentials; Intracerebral recordings; Stereo-EEG; Somatosensory cortex; Second somatosensory area (SII); Insula (110) 133

Human brain; Pain; Motor Cortex; Inhibition; Laser EPs; SII area (110) 1475

Human high density EEG; Induced gamma band response; Spatial attention; Perception; Vision (110) 2074

Human motor cortex; Paired transcranial magnetic stimulation; Intracortical inhibition; Intracortical facilitation; Pyramidal tract neurons (110) 575

Human; Artificial; Dipole; Source; Localization (110) 106

Human; EEG classification; Mu rhythm; Voluntary movement; Sensorimotor cortex; Event-related desynchronization (110) 787

Human; Motor cortex; Cortical stimulation; Cortical inhibition; Magnetic stimulation (110) 550

Human; Oscillation; Gamma; Electrocorticogram; Sensorimotor cortex; Visuomotor task (110) 524

Human; Pattern electroretinogram; Retina; Dopamine antagonists; Parkinson's disease (110) 82

Human; Sleep; Insomnia; Electroencephalography; Sedative; Nonbarbiturate; Substance withdrawal syndrome (110) 1965

Human; Somatosensory cortex; Vibration; Auditory cortex; Tactile stimulation; Magnetoencephalography (110) 905

Human; Somatosensory evoked magnetic fields; Somatosensory cortex; Index finger; Palm; Distal-proximal representation (110) 430

Humans; Visual evoked potentials; Ultraviolet radiation; Vision (110) 379

Hyperacusis; Tinnitus; Auditory evoked response; Augmenting/reducing; Serotonin; Frontal cortex (110) 666

Hypersomnia; Epworth Sleepiness Scale; Narcolepsy; Maintenance of Wakefulness Test; Multiple Sleep Latency Test; Modafinil (110) 2131

Hypoglossal nerve; Magnetic stimulation; Tongue; Motor evoked potential; Lingual muscle (110) 445

40 Hz; Oscillations; Gamma rhythm; Potential field; Current source density; Interneurons (110) 660

600 Hz wavelets; Somatosensory evoked potentials; Oscillatory somatosensory evoked potentials; Dipole source analysis; Primary somatosensory cortex; Thalamocortical projection; Median nerve (110) 1659

Ictal fast activity; Spasms; AR-analysis; Coherence (110) 593

Ictal; Epilepsy; Source localization; Frequency analysis (110) 176

Illusory contours; Binding; Evoked potentials; Kanizsa figures; Phase locking; Wavelet transform (110) 636

Immunosuppresive therapy; Castleman's disease; Angiofolicullar lymph node hyperplasia; Chronic inflammatory demyelinating polyradiculoneuropathy; Electrophysiological studies; Interleukin-6 (110) 1133

In vitro; EEG; Epilepsy; Turtle brain (110) 1535

Independent component analysis; EEG; Epileptiform discharge; Principal component analysis (110) 1755

Index finger; Human; Somatosensory evoked magnetic fields; Somatosensory cortex; Palm; Distal-proximal representation (110) 430

Indirect I waves; Paired transcranial magnetic stimulation; Cortico-cortical inhibition; Motor cortex; Current flow direction (110) 1106

Induced gamma band response; Human high density EEG; Spatial attention; Perception; Vision (110) 2074

Inertial load; Movement-related potentials; Movement kinematics; Motor control (110) 1764

Infant EEG; EEG development; Alpha rhythm; Sensorimotor rhythm; Twins (110) 997

Information processing; EEG; Event-related potentials; N100; Reaction time; Cortical activation; Signal-to-noise ratio; Stochastic resonance (110) 1193

Inhibition; Pain; Motor Cortex; Laser EPs; SII area; Human brain (110) 1475

Inhibitory interneurons; Somatosensory cortex; High-frequency magnetic oscillations; Primary response (N20m); Pyramidal neurons; Interference (110) 1445

Innervation variability; Sensory innervation; Ring finger; Nerve conduction studies; Carpal tunnel syndrome (110) 1492

Innocuous somatosensation; Somatosensory evoked potentials; Primary somatosensory (110) 2104

Input-output relation; Foot motor cortex; Air stimulation; Corti-

cal efferent zones; Transcranial magnetic stimulation (110) 1315

Insomnia; Human; Sleep; Electroencephalography; Sedative; Nonbarbiturate; Substance withdrawal syndrome (110) 1965

Instantaneous EEG coherence; Stroop task; Frontal and parietal area of the cortex; Hemispheres; Event-related potentials (110) 1410

Insula; Pain; CO_2-laser evoked potentials; Intracerebral recordings; Stereo-EEG; Somatosensory cortex; Second somatosensory area (SII); Human brain (110) 133

Intensive care; MMN; Auditory N100; MLAEP; BAEP; Coma (110) 1601

Interaction; Magnetoencephalography; Visual stimuli; Auditory stimulus; Attention (110) 295

Intercerebral recordings; Interictal spikes; Dipole Modeling; Scalp EEG (110) 1013

Interference pattern; Turns/Amplitude analysis; Amplitude threshold; Quantitative needle electromyography (110) 1139

Interference; Somatosensory cortex; High-frequency magnetic oscillations; Primary response (N20m); Inhibitory interneurons; Pyramidal neurons (110) 1445

Interhemispheric transfer; Visual evoked potential; Corpus callosum; Frequency analysis; Healthy subject (110) 71

Interictal spikes; Dipole Modeling; Scalp EEG; Intercerebral recordings (110) 1013

Interleukin-6; Castleman's disease; Angiofolicullar lymph node hyperplasia; Chronic inflammatory demyelinating polyradiculoneuropathy; Electrophysiological studies; Immunosuppresive therapy (110) 1133

Interneurons; Oscillations; Gamma rhythm; 40 Hz; Potential field; Current source density (110) 660

Intracellular action potential; Motor unit action potential; Motor unit; Volume conduction; Far-field potential (110) 1876

Intracellular action potential; Single muscle fiber; Volume conduction; Needle electromyography; Computer modeling (110) 166

Intracerebral recordings; Pain; CO_2-laser evoked potentials; Stereo-EEG; Somatosensory cortex; Second somatosensory area (SII); Insula; Human brain (110) 133

Intracortical facilitation; Paired transcranial magnetic stimulation; Intracortical inhibition; Human motor cortex; Pyramidal tract neurons (110) 575

Intracortical inhibition; Paired transcranial magnetic stimulation; Intracortical facilitation; Human motor cortex; Pyramidal tract neurons (110) 575

Intracortical pathway; Progressive myoclonus epilepsy; Transcranial magnetic stimulation; Cortical rhythm (110) 152

Intracranial EEG; Temporal lobe epilepsy; Stationarity; Nonlinear analysis (110) 1726

Intracranial event-related potentials; Laterality; Central sulcus; Vision; Motor (110) 1210

Intracranial event-related potentials; Laterality; P3; Prefrontal cortex; Medial temporal lobe (110) 1226

Intractability; Antiepileptic drugs; Developmental delay; Seizures (110) 1245

Intractable seizures; Ambulatory cassette-EEG; Video-EEG monitoring; Psychogenic seizures (110) 1452

Intra-individual variability; Quantitative EEG; Long-term study (110) 1708

Intra-individual variability; Somatosensory evoked potentials; Median nerve; Far-field; Repeat reliability (110) 1664

Intraoperative EEG monitoring; Carotid endarterectomy; Quantitative EEG; Spectral analysis; Cerebral ischemia (110) 286

Intraoperative monitoring; Acoustic neurinoma; Brain-stem auditory evoked potentials; Hearing preservation; Delayed hearing loss (110) 1935

Intraoperative monitoring; Motor evoked potential; Multipulse transcranial electrical stimulation; Partial neuromuscular blockade; Thoracoabdominal aortic aneurysm surgery (110) 1144

Inverse filtering; Speech production; Speech synthesis; Speech perception; Auditory discrimination; Mismatch negativity (110) 1329

Inverse problem; Magnetoencephalography; Realistic head model; Spherical head model; Dipole localization; Boundary element method (110) 2176

Isogony principle; Coordination; Kinematics; Multi-directional movement (110) 757

I-waves; Paired magnetic stimuli; Multiple sclerosis; CMAP facilitation (110) 712

Jaw movement; Condyle; Computer tomography; Electromyography; Lateral pterygoid muscle; Compartmentalization (110) 944

Jendrassik maneuver; Transcranial magnetic stimulation; Motor evoked potentials; Conditioning; Facilitation; Thalamic infarction (110) 499

Kanizsa figures; Binding; Evoked potentials; Illusory contours; Phase locking; Wavelet transform (110) 636

K-complex; Event-related potentials; P300; Sleep; Subject's own name (110) 2153

Kinematics; Coordination; Multi-directional movement; Isogony principle (110) 757

Kinetic form; Event-related potential; Visual-spatial attention; Selection negativity; Low resolution electromagnetic tomography (110) 329

Koniocellular; Parvocellular; Magnocellular; Chromatic contrast; Luminance contrast; VEPs (110) 772

Language; Transcranial magnetic stimulation; Speech; Frontal lobe (110) 1073

Laplacian map; EEG; Absence seizure; Spike-wave topography (110) 1568

Laplacian; Neocortical dynamics; Electroencephalogram; Coherence; Cortical development (110) 1351

Laser EPs; Pain; Motor Cortex; Inhibition; SII area; Human brain (110) 1475

Late auditory evoked potentials; Autism; Mental retardation; Children; N1 wave; T complex; Auditory modulation; Stimulus intensity (110) 1927

Late-effects; Attention; Childhood cancer; Cognition; Event-related synchronization; Event-related desynchronization; Memory (110) 2064

Latency; Age; Arousal systems; Brain; Electroencephalography; Evoked potentials; Sex; Wakefulness (110) 1427

Lateral pterygoid muscle; Condyle; Jaw movement; Computer tomography; Electromyography; Compartmentalization (110) 944

Laterality; Intracranial event-related potentials; Central sulcus; Vision; Motor (110) 1210

Laterality; Intracranial event-related potentials; P3; Prefrontal cortex; Medial temporal lobe (110) 1226

Lateralized epileptiform discharges; Periodicity; Discharge frequency; Discharge morphology (110) 1516

LED goggles; Visual evoked potentials; Vector analysis; Pattern-reversal; Retrochiasmatic lesions (110) 390

Left ear advantage; Event related potentials; Dichotic; Hemispheric lateralization; Pitch discrimination (110) 516

Lexical decision task; N400; Automatic and controlled processes; Semantic priming; Visual ERP (110) 813

Light-emitting diode; Transient visual evoked potentials; Steady-state visual evoked potentials; Pattern reversal; School children (110) 97

Limit cycle; Electroencephalogram; Alpha rhythm; Modelling; Non-linearity; Chaos; Non-linear prediction (110) 1801

Linear equation; Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; ECoG; Experts; Feature extraction; Golden standard; Neural network; On-line detection; Pruning; Spike evaluation; Spike triggered investigation; TEMPLAS; Template matching (110) 887

Lingual muscle; Magnetic stimulation; Hypoglossal nerve; Tongue; Motor evoked potential (110) 445

Localization; Artificial; Dipole; Human; Source (110) 106

Long-latency reflex; Rectified electromyography; Cortical relay time (110) 1975

Long-latency reflexes; Cortical relay time; Hand muscles; Foot muscles (110) 2014

Long-term study; Quantitative EEG; Intra-individual variability (110) 1708

Low and high threshold motor units; Needle electromyography; Standardisation; External anal sphincter muscle; Motor unit potentials (110) 1488

Low resolution electromagnetic tomography; Event-related potential; Visual-spatial attention; Selection negativity; Kinetic form (110) 329

Luminance contrast; Parvocellular; Koniocellular; Magnocellular; Chromatic contrast; VEPs (110) 772

Macro EMG; Concentric needle EMG; Poliomyelitis; Reinnervation (110) 1900

Macro-EMG; Electromyography; Concentric needle EMG; Mitochondriopathy; Fibre density; Diagnosis (110) 1466

Macro-potential; Motor units; Twitch characteristics; Wrist extensor muscles; Amyotrophic lateral sclerosis (110) 960

Magnetic brain stimulation; Motor evoked potential; Neurological disease; Amyotrophic lateral sclerosis; Myelopathy; Pyramidal sign (110) 1297

Magnetic cortical stimulation; Contingent negative variation; Motor evoked potential; Cortical silent period (110) 1394

Magnetic field; Electromyogram; Superconducting quantum interference device; Motor unit; Dipole (110) 284

Magnetic stimulation; Accessory nerve; Excitation site; Coil orientation; Short latency response (110) 1100

Magnetic stimulation; Electrical stimulation; Corticospinal tract; Spastic paraparesis; Motor cortex (110) 1641

Magnetic stimulation; Human; Motor cortex; Cortical stimulation; Cortical inhibition (110) 550

Magnetic stimulation; Hypoglossal nerve; Tongue; Motor evoked potential; Lingual muscle (110) 445

Magnetic stimulation; Mapping; Stroke; Recovery (110) 487

Magnetic stimulation; Motor evoked potential; Motor unit; Peristimulus time histogram; Pyramidal tract (110) 1123

Magnetic stimulation; Motor inhibition; Supraorbital nerve; Motor evoked response; First dorsal interosseus muscle; Blink reflex (110) 1090

Magnetic stimulation; Motor neuron disease; Amyotrophic lateral sclerosis; Central conduction time (110) 975

Magnetoencephalography/electroencephalography; Evoked responses; Multiple cognitive tasks; Spatio-temporal dipole model; Common spatial subspace decomposition; Covariance matrix analysis (110) 604

magnetoencephalography; Alzheimer's disease; Preconscious auditory processing; N100m (110) 1942

Magnetoencephalography; Auditory evoked responses; Temporal processing; Dipole localisation; Auditory cortex (110) 856

Magnetoencephalography; Dipole moment; Somatosensory evoked field; Stimulus intensity; Threshold of muscle twitch (110) 2127

Magnetoencephalography; Electroencephalography; Evoked potential; Hippocampus; CA3; Carbachol; Calcium-dependent potassium conductance; Afterhyperpolarization; Epilepsy (110) 1858

Magnetoencephalography; Evoked potentials; Esophagus; Cortical representation (110) 1435

Magnetoencephalography; Interaction; Visual stimuli; Auditory stimulus; Attention (110) 295

Magnetoencephalography; Pig; Swine; Electroencephalography; Biomagnetism; Evoked potential; Evoked magnetic field; Somatosensory cortex; Neuromagnetism (110) 230

Magnetoencephalography; Realistic head model; Spherical head model; Dipole localization; Boundary element method; Inverse problem (110) 2176

Magnetoencephalography; Somatosensory cortex; High-frequency magnetic oscillations; Posterior tibial nerve; Time–frequency components; Multiple signal classification algorithm (110) 1585

Magnetoencephalography; Somatosensory cortex; Vibration; Auditory cortex; Tactile stimulation; Human (110) 905

Magnetoencephalography; Swine; Pig; Biomagnetism; Somatic evoked potential; Somatic evoked magnetic field; Somatosensory cortex (110) 214

Magnocellular pathway; Contrast sensitivity; Pituitary adenoma; Parvocellular pathway (110) 876

Magnocellular; Parvocellular; Koniocellular; Chromatic contrast; Luminance contrast; VEPs (110) 772

Maintenance of Wakefulness Test; Epworth Sleepiness Scale; Narcolepsy; Hypersomnia; Multiple Sleep Latency Test; Modafinil (110) 2131

Mapping; Magnetic stimulation; Stroke; Recovery (110) 487

Mapping; TMS; MEP; Model; Accuracy (110) 941

Masticatory muscles ; Exteroceptive suppression; Trigeminal reflex; Nociception; Electrical stimulation; Motor physiology (110) 1290

Matching Pursuit; Adaptive approximations; Sleep spindles; Slow wave activity (110) 2136

Maturation; Aging; Coefficient of Variation; Electroencephalogram (110) 1399

Maximum entropy; Alpha activity; EEG inverse problem; Sine-cosine diagram; Dipole sources (110) 538

Mechanoreceptive afferent; Somatosensory evoked potential; Steady state; Vibration; Tuning function (110) 1953

Medial temporal lobe; Intracranial event-related potentials; Laterality; P3; Prefrontal cortex (110) 1226

Median nerve SEP; N30; Gating; Source localization; Current density reconstruction; Boundary element method (110) 1589

Median nerve stimulation; Brainstem; Posterior tibial nerve stimulation; Somatosensory evoked potentials (110) 1458

Median nerve stimulation; Central conduction; Somatosensory evoked potential; Onset to onset measurement; Peak to peak measurement; Multiple regression analysis (110) 2094

Median nerve stimulation; Functional magnetic resonance imaging; Somatosensory cortex; Motor cortex; Human brain mapping; Somatosensory evoked potential (110) 47

Median nerve stimulation; High-frequency oscillation; Posterior tibial nerve stimulation; Primary somatosensory responses (P37 and N20) (110) 1948

Median nerve; Axonal polyneuropathy; Conduction velocity; Nerve conduction; Temperature; Tibial nerve (110) 933

Median nerve; Curve fitting; Simulation; Distal latencies; Frequency distribution (110) 556

Median nerve; Somatosensory evoked potentials; 600 Hz wavelets; Oscillatory somatosensory evoked potentials; Dipole source analysis; Primary somatosensory cortex; Thalamocortical projection (110) 1659

Median nerve; Somatosensory evoked potentials; Intra-individual variability; Far-field; Repeat reliability (110) 1664

Medical-records systems; Electroencephalography; Databases; Computer-systems; Reference standards; Automatic data processing (110) 986

MEG; EEG; Verbal memory performance; Early activity (110) 1378

Memory scanning; Evoked potentials; Auditory sensory cortex (110) 2086

Memory; Attention; Childhood cancer; Cognition; Event-related synchronization; Event-related desynchronization; Late-effects (110) 2064

Memory; Event related spectral power; Epilepsy; Alpha rhythm; Prefrontal cortex (110) 676

Mental retardation; Autism; Children; Late auditory evoked potentials; N1 wave; T complex; Auditory modulation; Stimulus intensity (110) 1927

MEP; TMS; Mapping; Model; Accuracy (110) 941

Methods; H-reflex; EMG; Recovery curve (110) 2044

Microstates; Continuous performance test; Electrophysiology; Evoked potentials; Spatial analysis; NoGo-anteriorisation (110) 833

Microstructure Analysis; CAP Detector; Cyclic alternating pattern; Sleep EEG (110) 585

Middle-latency auditory evoked potential; Auditory evoked potential; Steady-state response; Repetition rate; Adaptation; Rat (110) 62

Minimal neuropathy; Chronic sensory demyelinating neuropathy; Chronic inflammatory demyelinating neuropathy; Asymptomatic neuropathy (110) 694

Mismatch negativity; Speech production; Inverse filtering; Speech synthesis; Speech perception; Auditory discrimination (110) 1329

Mismatch negativity; Auditory event-related potentials; Auditory sensory memory; Neural-memory trace; Spectrally complex tones (110) 1388

Mismatch negativity; Auditory; Cleft lip; Cleft palate; Evoked potentials; Short-term memory (110) 1921

Mismatch negativity; Cleft palate; Event-related potentials; Newborn (110) 324

Mismatch negativity; Event-related potentials; Reliability; Attention (110) 317

Mismatch negativity; Tuberous sclerosis; Auditory evoked responses; N100; Autism; Temporal lobe (110) 1825

Mitochondrial cytopathies; Concentric needle electromyography; Single fiber electromyography; Nerve conduction studies (110) 1284

Mitochondriopathy; Electromyography; Concentric needle EMG; Macro-EMG; Fibre density; Diagnosis (110) 1466

MLAEP; MMN; Auditory N100; BAEP; Coma; Intensive care (110) 1601

MMN; Auditory N100; MLAEP; BAEP; Coma; Intensive care (110) 1601

Modafinil; Epworth Sleepiness Scale; Narcolepsy; Hypersomnia; Maintenance of Wakefulness Test; Multiple Sleep Latency Test (110) 2131

Modafinil; Evoked potentials; Narcolepsy; P300; Predictive value of tests; Treatment outcome (110) 1041

Modality; P300; Event-related potential; Three stimulus; Topography (110) 463

Model; TMS; Mapping; MEP; Accuracy (110) 941

Modelling; Electroencephalogram; Alpha rhythm; Non-linearity; Chaos; Limit cycle; Non-linear prediction (110) 1801

Motion direction; Visual evoked potentials; Motion perception; Vestibular visual interaction (110) 192

Motion perception; Visual evoked potentials; Motion direction; Vestibular visual interaction (110) 192

Motoneuron; Muscular dystrophy; Motor unit; Motor unit recruitment; Firing rate (110) 1111

Motor axons; Strength–duration time constant; Rheobase; Excitability; Voltage-dependence (110) 1618

Motor control; Electromyography; Pattern of movement; Postural activity; Postural adjustment; Sit-to-stand (110) 1634

Motor control; Experimental muscle pain; Stretch reflex; Walking; Soleus muscle (110) 2033

Motor control; Movement-related cortical potentials; Voluntary muscle relaxation; Foot movement; Negative motor phenomenon; Topographic mapping (110) 397

Motor control; Movement-related potentials; Inertial load; Movement kinematics (110) 1764

Motor control; Tremor; EEG; Visual evoked response; Central oscillator (110) 2020

Motor control; Walking; Short and long-latency stretch reflexes; Spasticity; Soleus muscle (110) 951

Motor cortex; Cortical myoclonus; Cortical stimulation; Cortical inhibition; Transcranial magnetic stimulation (110) 1521

Motor cortex; Functional magnetic resonance imaging; Median nerve stimulation; Somatosensory cortex; Human brain mapping; Somatosensory evoked potential (110) 47

Motor cortex; Human; Cortical stimulation; Cortical inhibition; Magnetic stimulation (110) 550

Motor cortex; Magnetic stimulation; Electrical stimulation; Corticospinal tract; Spastic paraparesis (110) 1641

Motor Cortex; Pain; Inhibition; Laser EPs; SII area; Human brain (110) 1475

Motor cortex; Paired transcranial magnetic stimulation; Corticocortical inhibition; Current flow direction; Indirect I waves (110) 1106

Motor evoked potential; Contingent negative variation; Cortical silent period; Magnetic cortical stimulation (110) 1394

Motor evoked potential; Intraoperative monitoring; Multipulse transcranial electrical stimulation; Partial neuromuscular blockade; Thoracoabdominal aortic aneurysm surgery (110) 1144

Motor evoked potential; Magnetic brain stimulation; Neurological disease; Amyotrophic lateral sclerosis; Myelopathy; Pyramidal sign (110) 1297

Motor evoked potential; Magnetic stimulation; Hypoglossal nerve; Tongue; Lingual muscle (110) 445

Motor evoked potential; Motor unit; Magnetic stimulation; Peristimulus time histogram; Pyramidal tract (110) 1123

Motor evoked potentials; Head injury; Somatosensory evoked potentials; Transcranial magnetic stimulation (110) 1080

Motor evoked potentials; Transcranial magnetic stimulation; Conditioning; Jendrassik maneuver; Facilitation; Thalamic infarction (110) 499

Motor evoked response; Magnetic stimulation; Motor inhibition; Supraorbital nerve; First dorsal interosseus muscle; Blink reflex (110) 1090

Motor evoked responses; Spinal cord monitoring; Spatial facilitation; Corticospinal; Scoliosis surgery (110) 720

Motor fiber involvement; Carpal tunnel syndrome; Abnormal distal motor latency; Normal sensory conduction velocity (110) 1471

Motor imagery; Brain; potentials; Eye movement (110) 799

Motor inhibition; Magnetic stimulation; Supraorbital nerve; Motor evoked response; First dorsal interosseus muscle; Blink reflex (110) 1090

Motor mapping; Neuronal plasticity; Transcranial magnetic stimulation; Poliomyelitis (110) 806

Motor nerve conduction; Conduction block; Temporal dispersion; Polyneuropathy; Diagnosis (110) 740

Motor nerve conductions; Chronic inflammatory demyelinating polyneuropathy; Diabetic polyneuropathy; Pathology (110) 705

Motor neurography; Surface electrodes; Recording area (110) 2171

Motor neuron disease; Amyotrophic lateral sclerosis; Magnetic stimulation; Central conduction time (110) 975

Motor neuropathy; Thalidomide; F-chronodispersion (110) 735

Motor physiology; Exteroceptive suppression; Trigeminal reflex; Nociception; Electrical stimulation; Masticatory muscles (110) 1290

Motor preparation; Event-related desynchronization; Slow potentials; Stimulus anticipation (110) 250

Motor subroutine; CNV; Writer's cramp; Dystonia; Pathophysiology (110) 508

Motor unit action potential; Motor unit; Intracellular action potential; Volume conduction; Far-field potential (110) 1876

Motor unit action potential; Needle electromyography; Satellite potential; Muscle fiber longitudinal splitting; Velocity recovery function (110) 1625

Motor unit activation; Firing rate; Force generation; EMG signal decomposition (110) 1270

Motor unit potentials; Needle electromyography; Standardisation; External anal sphincter muscle; Low and high threshold motor units (110) 1488

Motor unit recruitment; Muscular dystrophy; Motoneuron; Motor unit; Firing rate (110) 1111

Motor unit; Motor evoked potential; Magnetic stimulation; Peristimulus time histogram; Pyramidal tract (110) 1123

Motor unit; Motor unit action potential; Intracellular action potential; Volume conduction; Far-field potential (110) 1876

Motor unit; Muscular dystrophy; Motoneuron; Motor unit recruitment; Firing rate (110) 1111

Motor unit; Superconducting quantum interference device; Magnetic field; Electromyogram; Dipole (110) 284

Motor units; Twitch characteristics; Macro-potential; Wrist extensor muscles; Amyotrophic lateral sclerosis (110) 960

Motor; Intracranial event-related potentials; Laterality; Central sulcus; Vision (110) 1210

Motorcortex mapping; Transcranial magnetic stimulation; Functional magnetic resonance imaging; Hand knob (110) 699

Movement kinematics; Movement-related potentials; Inertial load; Motor control (110) 1764

Movement-related cortical potentials; Voluntary muscle relaxation; Foot movement; Negative motor phenomenon; Motor control; Topographic mapping (110) 397

Movement-related potentials; Inertial load; Movement kinematics; Motor control (110) 1764

MRI; Electrode cap; EEG; Functional MRI (110) 2189

M-sequence; Retinotopy; Retinotopic map; Visual-evoked potential; Multi-electrode recording; Dipole source localization; White noise (110) 1793

MSLT; Narcolepsy; Excessive daytime sleepiness; Nocturnal sleep (110) 1531

Mu rhythm; EEG classification; Voluntary movement; Sensorimotor cortex; Human; Event-related desynchronization (110) 787

Multicentre EMG database; Electromyography; Nerve conduction; Diagnostic strategies; Diagnostic criteria; Neuromuscular disorders (110) 1814

Multi-directional movement; Coordination; Kinematics; Isogony principle (110) 757

Multi-electrode recording; Retinotopy; Retinotopic map; Visual-evoked potential; Dipole source localization; M-sequence; White noise (110) 1793

Multiple cognitive tasks; Magnetoencephalography/electroencephalography; Evoked responses; Spatio-temporal dipole model; Common spatial subspace decomposition; Covariance matrix analysis (110) 604

Multiple regression analysis; Central conduction; Somatosensory evoked potential; Median nerve stimulation; Onset to onset measurement; Peak to peak measurement (110) 2094

Multiple sclerosis; Focal transcranial magnetic cortex stimulation; Corpus callosum; Transcallosal inhibition (110) 748

Multiple sclerosis; I-waves; Paired magnetic stimuli; CMAP facilitation (110) 712

Multiple signal classification algorithm; Somatosensory cortex; High-frequency magnetic oscillations; Posterior tibial nerve; Magnetoencephalography; Time–frequency components (110) 1585

Multiple Sleep Latency Test; Epworth Sleepiness Scale; Narcolepsy; Hypersomnia; Maintenance of Wakefulness Test; Modafinil (110) 2131

Multipulse transcranial electrical stimulation; Intraoperative monitoring; Motor evoked potential; Partial neuromuscular blockade; Thoracoabdominal aortic aneurysm surgery (110) 1144

Muscle fatigue; Electromyography; Surface electromyography; Reliability; Muscle torque (110) 725

Muscle fiber longitudinal splitting; Needle electromyography; Motor unit action potential; Satellite potential; Velocity recovery function (110) 1625

Muscle tonus; Neck muscles; Head movements; Athetosis; Nerve block; Surgery (110) 1308

Muscle torque; Electromyography; Surface electromyography; Reliability; Muscle fatigue (110) 725

Muscular dystrophy; Motoneuron; Motor unit; Motor unit recruitment; Firing rate (110) 1111

Myelopathy; Motor evoked potential; Magnetic brain stimulation; Neurological disease; Amyotrophic lateral sclerosis; Pyramidal sign (110) 1297

Myoclonus epilepsy; Somatosensory evoked potential; High-frequency oscillation; Parkinson's disease (110) 185

N1 wave; Autism; Mental retardation; Children; Late auditory evoked potentials; T complex; Auditory modulation; Stimulus intensity (110) 1927

N100; EEG; Event-related potentials; Information processing; Reaction time; Cortical activation; Signal-to-noise ratio; Stochastic resonance (110) 1193

N100; Tuberous sclerosis; Auditory evoked responses; Mismatch negativity; Autism; Temporal lobe (110) 1825

N100m; Alzheimer's disease; magnetoencephalography; Preconscious auditory processing (110) 1942

N2; Event-related potentials; Aging; P3; Attention (110) 564

N2; Saccadic eye movement; Finger movement; Go/NoGo task; P300; Error related negativity (110) 1058

N30; Median nerve SEP; Gating; Source localization; Current density reconstruction; Boundary element method (110) 1589

N300; Event-related potentials; P300; Smoking cue-reactivity; Tobacco addiction; Deviance detection; Automatic processing; Unpleasantness (110) 1570

N400; Automatic and controlled processes; Lexical decision task; Semantic priming; Visual ERP (110) 813

Nap; Post-lunch dip; Daytime sleepiness; Performance; Vigilance; EEG alpha activity (110) 272

Narcolepsy; Epworth Sleepiness Scale; Hypersomnia; Maintenance of Wakefulness Test; Multiple Sleep Latency Test; Modafinil (110) 2131

Narcolepsy; Evoked potentials; Modafinil; P300; Predictive value of tests; Treatment outcome (110) 1041

Narcolepsy; Excessive daytime sleepiness; Nocturnal sleep; MSLT (110) 1531

Near field potentials; Visual evoked potentials; Optic tract; Pallidotomy; Band-pass filter; Potentials (110) 92

Neck muscles; Muscle tonus; Head movements; Athetosis; Nerve block; Surgery (110) 1308

Needle electromyography; Intracellular action potential; Single muscle fiber; Volume conduction; Computer modeling (110) 166

Needle electromyography; Motor unit action potential; Satellite potential; Muscle fiber longitudinal splitting; Velocity recovery function (110) 1625

Needle electromyography; Standardisation; External anal sphincter muscle; Low and high threshold motor units; Motor unit potentials (110) 1488

Negative motor phenomenon; Movement-related cortical potentials; Voluntary muscle relaxation; Foot movement; Motor control; Topographic mapping (110) 397

Negative slope; Voluntary movement; Bereitschaftspotential; Cerebellar dentate nucleus (110) 126

Neocortex; Amygdala; Coherence; Classification; Epilepsy network; Hippocampus; Stereo-electroencephalography; Temporal lobe epilepsy (110) 1741

Neocortex; Somatosensory cortex; Consciousness; Cortical circuitry; Apical dendrites; Touch (110) 1987

Neocortical dynamics; Electroencephalogram; Laplacian; Coherence; Cortical development (110) 1351

Neonatal hypoxic-ischaemic encephalopathy; Electroencephalogram; Full-term newborn; Constantly discontinuous EEG pattern; Burst-suppression (110) 1510

Neonatal hypoxic-ischemic encephalopathy; Outcome; EEG (110) 655

Neonate; Alpha; Theta; EEG (110) 438

Nerve block; Muscle tonus; Neck muscles; Head movements; Athetosis; Surgery (110) 1308

Nerve conduction studies; Mitochondrial cytopathies; Concentric needle electromyography; Single fiber electromyography (110) 1284

Nerve conduction studies; Sensory innervation; Innervation variability; Ring finger; Carpal tunnel syndrome (110) 1492

Nerve conduction velocity; Premature infant; Evoked potentials; Polyunsaturated fatty acids (110) 1363

Nerve conduction; Axonal polyneuropathy; Conduction velocity; Median nerve; Temperature; Tibial nerve (110) 933

Nerve conduction; Electromyography; Carpal tunnel syndrome; Palmar conduction (110) 1462

Nerve conduction; Electromyography; Diagnostic strategies; Diagnostic criteria; Neuromuscular disorders; Multicentre EMG database (110) 1814

Neural conduction; Hand-arm vibration syndrome; Carpal tunnel syndrome; Neuropathy (110) 1276

Neural network; Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; ECoG; Experts; Feature extraction; Golden standard; Linear equation; On-line detection; Pruning; Spike evaluation; Spike triggered investigation; TEMPLAS; Template matching (110) 887

Neural network; Electroencephalography; Spike detection; Computer; Clustering (110) 404

Neural-memory trace; Auditory event-related potentials; Auditory sensory memory; Mismatch negativity; Spectrally complex tones (110) 1388

Neurological disease; Motor evoked potential; Magnetic brain stimulation; Amyotrophic lateral sclerosis; Myelopathy; Pyramidal sign (110) 1297

Neurological diseases; Positron emission tomography; Single photon emission computerized tomography; Pathophysiology (110) 2

Neuromagnetism; Pig; Swine; Magnetoencephalography; Electroencephalography; Biomagnetism; Evoked potential; Evoked magnetic field; Somatosensory cortex (110) 230

Neuromuscular disorders; Electromyography; Nerve conduction; Diagnostic strategies; Diagnostic criteria; Multicentre EMG database (110) 1814

Neuronal plasticity; Transcranial magnetic stimulation; Motor mapping; Poliomyelitis (110) 806

Neuropathy; Hand-arm vibration syndrome; Neural conduction; Carpal tunnel syndrome (110) 1276

Newborn; Cleft palate; Event-related potentials; Mismatch negativity (110) 324

Nigrostriatal neurones; Parkinsons disease; Dopamine (110) 2006

Nociception; Exteroceptive suppression; Trigeminal reflex; Electrical stimulation; Masticatory muscles; Motor physiology (110) 1290

Nocturnal sleep; Narcolepsy; Excessive daytime sleepiness; MSLT (110) 1531

NoGo-anteriorisation; Continuous performance test; Electrophysiology; Evoked potentials; Spatial analysis; Microstates (110) 833

Nonbarbiturate; Human; Sleep; Insomnia; Electroencephalography; Sedative; Substance withdrawal syndrome (110) 1965

Non-linear analysis; Temporal lobe epilepsy; Intracranial EEG; Stationarity (110) 1726

Non-linear dynamics; Alzheimer's disease; Electroencephalography; Chaos; Correlation dimension (110) 1159

Non-linear prediction; Electroencephalogram; Alpha rhythm; Modelling; Non-linearity; Chaos; Limit cycle (110) 1801

Non-linearity; Electroencephalogram; Alpha rhythm; Modelling; Chaos; Limit cycle; Non-linear prediction (110) 1801

non-REM sleep; Event related potentials; P300; REM sleep; Consciousness (110) 1345

Non-stationary processes; EEG; Seizures; Time series analysis; Time-varying autoregressive modeling (110) 2197

Normal sensory conduction velocity; Carpal tunnel syndrome; Motor fiber involvement; Abnormal distal motor latency (110) 1471

Novelty; Theta activity; Habituation; Orienting response; Frontal cortex (110) 1204

NREM sleep; Sleep spindles; Hippocampus; Epileptiform discharges (110) 687

Obstructive sleep apnea syndrome; Daytime performance; Drowsiness; Sleep; Adaptive segmentation; Automatic analysis; Vigilance test; Alertness (110) 1499

Oddball paradigm; Coma; Consciousness; Event-related potentials; P300; Psychophysiology (110) 1260

Oddball paradigm; Event-related potential; Cognitive processing; Sleep (110) 53

Olfactory event-related potential; Dementia; Down's syndrome; Olfactory (110) 1563

Olfactory; Dementia; Down's syndrome; Olfactory event-related potential (110) 1563

On-line detection; Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; ECoG; Experts; Feature extraction; Golden standard; Linear equation; Neural network; Pruning; Spike evaluation; Spike triggered investigation; TEMPLAS; Template matching (110) 887

Onset to onset measurement; Central conduction; Somatosensory evoked potential; Median nerve stimulation; Peak to peak measurement; Multiple regression analysis (110) 2094

Optic tract; Visual evoked potentials; Near field potentials; Pallidotomy; Band-pass filter; Potentials (110) 92

Order of stimuli presentation; AEPs; Augmenting/reducing; T complex; Stimulus intensity (110) 924

Orienting response; Theta activity; Habituation; Novelty; Frontal cortex (110) 1204

Orthostatic tremor; Tremor; Coherence analysis; EMG correlation analysis (110) 1774

Oscillation; Gamma; Electrocorticogram; Sensorimotor cortex; Visuomotor task; Human (110) 524

Oscillations; Gamma rhythm; 40 Hz; Potential field; Current source density; Interneurons (110) 660

Oscillatory somatosensory evoked potentials; Somatosensory evoked potentials; 600 Hz wavelets; Dipole source analysis; Primary somatosensory cortex; Thalamocortical projection; Median nerve (110) 1659

Outcome prediction; Epilepsy; Self-regulation; Slow cortical potentials (110) 683

Outcome; Neonatal hypoxic-ischemic encephalopathy; EEG (110) 655

P3; Event-related potentials; Aging; N2; Attention (110) 564

P3; Intracranial event-related potentials; Laterality; Prefrontal cortex; Medial temporal lobe (110) 1226

P300; Attention; Event-related potential; Stimulus-response compatibility; Stroop; Response time (110) 367

P300; Coma; Consciousness; Event-related potentials; Oddball paradigm; Psychophysiology (110) 1260

P300; Event related potentials; REM sleep; non-REM sleep; Consciousness (110) 1345

P300; Event-related potential; Modality; Three stimulus; Topography (110) 463

P300; Event-related potentials; N300; Smoking cue-reactivity; Tobacco addiction; Deviance detection; Automatic processing; Unpleasantness (110) 1570

P300; Event-related potentials; Sleep; Subject's own name; K-complex (110) 2153

P300; Evoked potentials; Modafinil; Narcolepsy; Predictive value of tests; Treatment outcome (110) 1041

P300; P3a; P3b; Event-related potential; Auditory/visual stimuli; Three-stimulus paradigm; Stimulus context (110) 24

P300; Saccadic eye movement; Finger movement; Go/NoGo task; N2; Error related negativity (110) 1058

P300; Schizophrenia; Event-related-potentials; Asymmetry (110) 1611

P3a; P300; P3b; Event-related potential; Auditory/visual stimuli; Three-stimulus paradigm; Stimulus context (110) 24

P3b; P300; P3a; Event-related potential; Auditory/visual stimuli; Three-stimulus paradigm; Stimulus context (110) 24

P3-ERP component; Dimensional complexity (110) 31

Pain; CO_2-laser evoked potentials; Intracerebral recordings; Stereo-EEG; Somatosensory cortex; Second somatosensory area (SII); Insula; Human brain (110) 133

Pain; Motor Cortex; Inhibition; Laser EPs; SII area; Human brain (110) 1475

Pain; Somatosensory evoked potentials; Anterior cingulate cortex; Supplementary somatosensory area (110) 2107

Paired magnetic stimuli; I-waves; Multiple sclerosis; CMAP facilitation (110) 712

Paired transcranial magnetic stimulation; Cortico-cortical inhibition; Motor cortex; Current flow direction; Indirect I waves (110) 1106

Paired transcranial magnetic stimulation; Intracortical inhibition; Intracortical facilitation; Human motor cortex; Pyramidal tract neurons (110) 575

Pallidotomy; Visual evoked potentials; Optic tract; Near field potentials; Band-pass filter; Potentials (110) 92

Palm; Human; Somatosensory evoked magnetic fields; Somatosensory cortex; Index finger; Distal-proximal representation (110) 430

Palm; Waveform; Sympathetic skin response; Sole; Habituation (110) 765

Palmar conduction; Nerve conduction; Electromyography; Carpal tunnel syndrome (110) 1462

Parallel visual pathways; Color and motion perception; Spinocerebellar degeneration; Parkinson's disease; Event-related potentials (110) 1048

Parkinson's disease; Color and motion perception; Spinocerebellar degeneration; Parallel visual pathways; Event-related potentials (110) 1048

Parkinson's disease; Schizophrenia; Event-related potentials; Contingent negative variation; Post-imperative negative variation (110) 1175

Parkinsons disease; Dopamine; Nigrostriatal neurones (110) 2006

Parkinson's disease; Pattern electroretinogram; Retina; Dopamine antagonists; Human (110) 82

Parkinson's disease; Somatosensory evoked potential; High-frequency oscillation; Myoclonus epilepsy (110) 185

Parkinson's disease; Somatosensory evoked potentials; Supplementary motor area; Deep brain stimulation (110) 1700

Parkinson's disease; Somatosensory evoked potentials; Thalamic stimulation (110) 146

Parkinson's disease; Sympathetic skin response; Amplitude asymmetry; Autonomic nervous system (110) 358

Partial neuromuscular blockade; Intraoperative monitoring; Motor evoked potential; Multipulse transcranial electrical stimulation; Thoracoabdominal aortic aneurysm surgery (110) 1144

Parvocellular pathway; Contrast sensitivity; Pituitary adenoma; Magnocellular pathway (110) 876

Parvocellular; Koniocellular; Magnocellular; Chromatic contrast; Luminance contrast; VEPs (110) 772

Pathology; Chronic inflammatory demyelinating polyneuropathy; Diabetic polyneuropathy; Motor nerve conductions (110) 705

Pathophysiology; CNV; Writer's cramp; Motor subroutine; Dystonia (110) 508

Pathophysiology; Positron emission tomography; Single photon emission computerized tomography; Neurological diseases (110) 2

Pattern electroretinogram; Retina; Dopamine antagonists; Human; Parkinson's disease (110) 82

Pattern of movement; Electromyography; Motor control; Postural activity; Postural adjustment; Sit-to-stand (110) 1634

Pattern reversal; Transient visual evoked potentials; Steady-state visual evoked potentials; Light-emitting diode; School children (110) 97

Pattern visual evoked potentials; Steady-state; Harmonic components; Spatial frequency; Color and luminance (110) 1959

Pattern-reversal; Visual evoked potentials; Vector analysis; LED goggles; Retrochiasmatic lesions (110) 390

Peak to peak measurement; Central conduction; Somatosensory evoked potential; Median nerve stimulation; Onset to onset measurement; Multiple regression analysis (110) 2094

Pentobarbital; Burst suppression; Corpus callosum (110) 103

Pentobarbital; Burst suppression; Corpus callosum; Status epilepticus (110) 1037

Perception of effort; Chronic fatigue syndrome; Transcranial magnetic stimulation; Fatigue (110) 1883

Perception; Human high density EEG; Induced gamma band response; Spatial attention; Vision (110) 2074

Performance; Nap; Post-lunch dip; Daytime sleepiness; Vigilance; EEG alpha activity (110) 272

Perineal nerve; Bulbocavernosus muscle; Dorsal nerve of the penis; Bulbocavernosus reflex (110) 412

Periodic leg movements in sleep; Restless legs syndrome; Sex; Age; Sleep stages (110) 1168

Periodicity; Lateralized epileptiform discharges; Discharge frequency; Discharge morphology (110) 1516

Peripheral nervous system disease; Peripheral neuropathy; Sensory neuropathy; Sensory testing; Quantitative sudomotor axon reflex testing; Electromyography (110) 1909

Peripheral neuropathy; Peripheral nervous system disease; Sensory neuropathy; Sensory testing; Quantitative sudomotor axon reflex testing; Electromyography (110) 1909

Peristimulus time histogram; Motor evoked potential; Motor unit; Magnetic stimulation; Pyramidal tract (110) 1123

Phase locking; Binding; Evoked potentials; Illusory contours; Kanizsa figures; Wavelet transform (110) 636

Phase-locking; Brain oscillations; Event-related potentials;

Single-sweep analysis; Frontal alpha rhythm; EEG; Cognitive (110) 1784

Photoreceptor degeneration; Retinal prosthesis; Evoked potentials (110) 1545

Pig; Swine; Magnetoencephalography; Biomagnetism; Somatic evoked potential; Somatic evoked magnetic field; Somatosensory cortex (110) 214

Pig; Swine; Magnetoencephalography; Electroencephalography; Biomagnetism; Evoked potential; Evoked magnetic field; Somatosensory cortex; Neuromagnetism (110) 230

Pitch discrimination; Event related potentials; Dichotic; Hemispheric lateralization; Left ear advantage (110) 516

Pituitary adenoma; Contrast sensitivity; Magnocellular pathway; Parvocellular pathway (110) 876

Poliomyelitis; Macro EMG; Concentric needle EMG; Reinnervation (110) 1900

Poliomyelitis; Neuronal plasticity; Transcranial magnetic stimulation; Motor mapping (110) 806

Polyneuropathy; Conduction block; Temporal dispersion; Motor nerve conduction; Diagnosis (110) 740

Polysomnography; Histogram analysis; Entropy; Artifact processing; Automatic analysis of sleep (110) 2165

Polyunsaturated fatty acids; Premature infant; Evoked potentials; Nerve conduction velocity (110) 1363

Positron emission tomography; Single photon emission computerized tomography; Neurological diseases; Pathophysiology (110) 2

Posterior tibial nerve stimulation; Brainstem; Median nerve stimulation; Somatosensory evoked potentials (110) 1458

Posterior tibial nerve stimulation; High-frequency oscillation; Median nerve stimulation; Primary somatosensory responses (P37 and N20) (110) 1948

Posterior tibial nerve; Somatosensory cortex; High-frequency magnetic oscillations; Magnetoencephalography; Time–frequency components; Multiple signal classification algorithm (110) 1585

Post-imperative negative variation; Schizophrenia; Event-related potentials; Contingent negative variation; Parkinson's disease (110) 1175

Post-lunch dip; Nap; Daytime sleepiness; Performance; Vigilance; EEG alpha activity (110) 272

Postural activity; Electromyography; Motor control; Pattern of movement; Postural adjustment; Sit-to-stand (110) 1634

Postural adjustment; Electromyography; Motor control; Pattern of movement; Postural activity; Sit-to-stand (110) 1634

Potential field; Oscillations; Gamma rhythm; 40 Hz; Current source density; Interneurons (110) 660

potentials; Motor imagery; Brain; Eye movement (110) 799

Potentials; Visual evoked potentials; Optic tract; Near field potentials; Pallidotomy; Band-pass filter (110) 92

Power analysis; Coherence; Estimation; Confidence intervals; Quantitative EEG (110) 1717

Preconscious auditory processing; Alzheimer's disease; magnetoencephalography; N100m (110) 1942

Predictive value of tests; Evoked potentials; Modafinil; Narcolepsy; P300; Treatment outcome (110) 1041

Prefrontal cortex; Event related spectral power; Memory; Epilepsy; Alpha rhythm (110) 676

Prefrontal cortex; Intracranial event-related potentials; Laterality; P3; Medial temporal lobe (110) 1226

Premature infant; Evoked potentials; Nerve conduction velocity; Polyunsaturated fatty acids (110) 1363

Prevalence; Benign epileptiform variants; Epilepsy; Electroencephalography (110) 280

Primary response (N20m); Somatosensory cortex; High-frequency magnetic oscillations; Inhibitory interneurons; Pyramidal neurons; Interference (110) 1445

Primary somatosensory; Somatosensory evoked potentials; Innocuous somatosensation (110) 2104

Primary somatosensory cortex; Somatosensory evoked potentials; 600 Hz wavelets; Oscillatory somatosensory evoked potentials; Dipole source analysis; Thalamocortical projection; Median nerve (110) 1659

Primary somatosensory responses (P37 and N20); High-frequency oscillation; Posterior tibial nerve stimulation; Median nerve stimulation (110) 1948

Principal component analysis; EEG; Epileptiform discharge; Independent component analysis (110) 1755

Prognosis; Absence; Fast discharges; EEG; AED (110) 1029

Prognosis; Alpha coma; EEG; Etiology (110) 205

Progressive myoclonus epilepsy; Transcranial magnetic stimulation; Cortical rhythm; Intracortical pathway (110) 152

Pruning; Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; ECoG; Experts; Feature extraction; Golden standard; Linear equation; Neural network; On-line detection; Spike evaluation; Spike triggered investigation; TEMPLAS; Template matching (110) 887

Psychogenic seizures; Ambulatory cassette-EEG; Video-EEG monitoring; Intractable seizures (110) 1452

Psychometic alterations; Hepatic encephalopathy; EEG spectral analysis; EEG automatic analysis; EEG (110) 1334

Psychophysiology; Coma; Consciousness; Event-related potentials; Oddball paradigm; P300 (110) 1260

Pyramidal neurons; Somatosensory cortex; High-frequency magnetic oscillations; Primary response (N20m); Inhibitory interneurons; Interference (110) 1445

Pyramidal sign; Motor evoked potential; Magnetic brain stimulation; Neurological disease; Amyotrophic lateral sclerosis; Myelopathy (110) 1297

Pyramidal tract neurons; Paired transcranial magnetic stimula-

tion; Intracortical inhibition; Intracortical facilitation; Human motor cortex (110) 575

Pyramidal tract; Motor evoked potential; Motor unit; Magnetic stimulation; Peristimulus time histogram (110) 1123

Quantitative EEG; Carotid endarterectomy; Intraoperative EEG monitoring; Spectral analysis; Cerebral ischemia (110) 286

Quantitative EEG; Coherence; Estimation; Confidence intervals; Power analysis (110) 1717

Quantitative EEG; Intra-individual variability; Long-term study (110) 1708

Quantitative electroencephalography; Spectral profile; Alzheimer' s disease (110) 1831

Quantitative electromyography; Cervical dystonia; Botulinum toxin A; Sternocleidomastoid muscle (110) 1650

Quantitative needle electromyography; Turns/Amplitude analysis; Amplitude threshold; Interference pattern (110) 1139

Quantitative sudomotor axon reflex testing; Peripheral nervous system disease; Peripheral neuropathy; Sensory neuropathy; Sensory testing; Electromyography (110) 1909

Quantitative topographical; EEG; FDG-PET; Vascular dementia; Frequency bands; Thalamus (110) 615

Rat; Auditory evoked potential; Middle-latency auditory evoked potential; Steady-state response; Repetition rate; Adaptation (110) 62

Rat; Electroencephalogram; Sleep; Sleep Regulation; Spectral analysis (110) 869

Reaction time; EEG; Event-related potentials; N100; Information processing; Cortical activation; Signal-to-noise ratio; Stochastic resonance (110) 1193

Reaction time; Event-related brain potential; Error processing; Spatial S-R compatibility tasks (110) 342

Reaction time; Gamma; Evoked; Single trial; Event-related potential (110) 158

Reading; Corticospinal excitability; Electromyographic responses; Transcranial magnetic stimulation (110) 424

Realistic head model; EEG; Dipole localization (110) 846

Realistic head model; Magnetoencephalography; Spherical head model; Dipole localization; Boundary element method; Inverse problem (110) 2176

Reciprocal inhibition; Forearm muscle; H-reflex; Spasticity; Test reflex size (110) 2194

Recording area; Motor neurography; Surface electrodes (110) 2171

Recovery curve; H-reflex; EMG; Methods (110) 2044

Recovery; Magnetic stimulation; Mapping; Stroke (110) 487

Rectified electromyography; Long-latency reflex; Cortical relay time (110) 1975

Reference standards; Electroencephalography; Databases; Computer-systems; Medical-records systems; Automatic data processing (110) 986

Reinnervation; Macro EMG; Concentric needle EMG; Poliomyelitis (110) 1900

Reliability; Electromyography; Surface electromyography; Muscle fatigue; Muscle torque (110) 725

Reliability; Event-related potentials; Mismatch negativity; Attention (110) 317

REM sleep; EEG power spectra; Alpha rhythm; Topography (110) 632

REM sleep; Event related potentials; P300; non-REM sleep; Consciousness (110) 1345

Repeat reliability; Somatosensory evoked potentials; Intra-individual variability; Median nerve; Far-field (110) 1664

Repetition rate; Auditory evoked potential; Middle-latency auditory evoked potential; Steady-state response; Adaptation; Rat (110) 62

Reproducibility; Tendon jerk; H-reflex; Voluntary contraction (110) 1481

Response time; Attention; Event-related potential; P300; Stimulus-response compatibility; Stroop (110) 367

Restless legs syndrome; Periodic leg movements in sleep; Sex; Age; Sleep stages (110) 1168

Retina; Pattern electroretinogram; Dopamine antagonists; Human; Parkinson's disease (110) 82

Retinal prosthesis; Evoked potentials; Photoreceptor degeneration (110) 1545

Retinitis pigmentosa; Apparent latency; Flicker stimulus; Electroretinogram; Harmonic components; Temporal frequency (110) 1554

Retinotopic map; Retinotopy; Visual-evoked potential; Multielectrode recording; Dipole source localization; M-sequence; White noise (110) 1793

Retinotopy; Retinotopic map; Visual-evoked potential; Multielectrode recording; Dipole source localization; M-sequence; White noise (110) 1793

Retrochiasmatic lesions; Visual evoked potentials; Vector analysis; Pattern-reversal; LED goggles (110) 390

Rheobase; Strength–duration time constant; Excitability; Voltage-dependence; Motor axons (110) 1618

Ring finger; Sensory innervation; Innervation variability; Nerve conduction studies; Carpal tunnel syndrome (110) 1492

Saccadic eye movement; Finger movement; Go/NoGo task; P300; N2; Error related negativity (110) 1058

Satellite potential; Needle electromyography; Motor unit action potential; Muscle fiber longitudinal splitting; Velocity recovery function (110) 1625

Scalp EEG; Interictal spikes; Dipole Modeling; Intercerebral recordings (110) 1013

Schizophrenia; Event-related potentials; Contingent negative

variation; Post-imperative negative variation; Parkinson's disease (110) 1175

Schizophrenia; P300; Event-related-potentials; Asymmetry (110) 1611

School children; Transient visual evoked potentials; Steady-state visual evoked potentials; Pattern reversal; Light-emitting diode (110) 97

Scoliosis surgery; Spinal cord monitoring; Spatial facilitation; Corticospinal; Motor evoked responses (110) 720

Second somatosensory area (SII); Pain; CO_2-laser evoked potentials; Intracerebral recordings; Stereo-EEG; Somatosensory cortex; Insula; Human brain (110) 133

Secondary bilateral synchrony; Coherence analysis; Flexor spasms; Video telemetry; Digital EEG (110) 374

Sedative; Human; Sleep; Insomnia; Electroencephalography; Nonbarbiturate; Substance withdrawal syndrome (110) 1965

Segregation; Visual evoked potentials; Textures; Filling-in; Edges (110) 86

Seizure detection; Automatic EEG analysis; Wavelet analysis; Spike detection computational efficiency (110) 239

Seizures; EEG; Non-stationary processes; Time series analysis; Time-varying autoregressive modeling (110) 2197

Seizures; Intractability; Antiepileptic drugs; Developmental delay (110) 1245

Selection negativity; Event-related potential; Visual-spatial attention; Kinetic form; Low resolution electromagnetic tomography (110) 329

Selective slow wave sleep deprivation; Auditory arousal thresholds; Sleep depth; Slow wave sleep rebound (110) 2148

Self-organized learning; Epileptiform discharges; Spikes; Artificial neural networks; Fuzzy logic; Bayesian (110) 2049

Self-regulation; Epilepsy; Outcome prediction; Slow cortical potentials (110) 683

Semantic memory; EEG; Event-related desynchronization; Event-related synchronization; Auditory processing; Concreteness/abstractness (110) 1371

Semantic priming; N400; Automatic and controlled processes; Lexical decision task; Visual ERP (110) 813

Sensorimotor cortex; EEG classification; Mu rhythm; Voluntary movement; Human; Event-related desynchronization (110) 787

Sensorimotor cortex; Oscillation; Gamma; Electrocorticogram; Visuomotor task; Human (110) 524

Sensorimotor function; Event-related desynchronization; Event-related synchronization; Voluntary movement; Brain oscillations (110) 1842

Sensorimotor rhythm; EEG development; Infant EEG; Alpha rhythm; Twins (110) 997

Sensory evoked potentials; Gait disorder; Falls; Aging (110) 2026

Sensory innervation; Innervation variability; Ring finger; Nerve conduction studies; Carpal tunnel syndrome (110) 1492

Sensory neuropathy; Peripheral nervous system disease; Peripheral neuropathy; Sensory testing; Quantitative sudomotor axon reflex testing; Electromyography (110) 1909

Sensory testing; Peripheral nervous system disease; Peripheral neuropathy; Sensory neuropathy; Quantitative sudomotor axon reflex testing; Electromyography (110) 1909

Serotonin; Tinnitus; Auditory evoked response; Augmenting/reducing; Frontal cortex; Hyperacusis (110) 666

Sex; Age; Arousal systems; Brain; Electroencephalography; Evoked potentials; Latency; Wakefulness (110) 1427

Sex; Restless legs syndrome; Periodic leg movements in sleep; Age; Sleep stages (110) 1168

Short and long-latency stretch reflexes; Walking; Spasticity; Soleus muscle; Motor control (110) 951

Short latency response; Magnetic stimulation; Accessory nerve; Excitation site; Coil orientation (110) 1100

Short-term memory; Auditory; Cleft lip; Cleft palate; Evoked potentials; Mismatch negativity (110) 1921

Signal to noise ratio; EEG reference; EEG average reference; High resolution EEG; Evoked potentials; Standard deviation (110) 1149

Signal-to-noise ratio; EEG; Event-related potentials; N100; Information processing; Reaction time; Cortical activation; Stochastic resonance (110) 1193

SII area; Pain; Motor Cortex; Inhibition; Laser EPs; Human brain (110) 1475

Simulation; Curve fitting; Distal latencies; Frequency distribution; Median nerve (110) 556

Sine-cosine diagram; Alpha activity; EEG inverse problem; Maximum entropy; Dipole sources (110) 538

Single fiber electromyography; Mitochondrial cytopathies; Concentric needle electromyography; Nerve conduction studies (110) 1284

Single muscle fiber; Intracellular action potential; Volume conduction; Needle electromyography; Computer modeling (110) 166

Single photon emission computerized tomography; Positron emission tomography; Neurological diseases; Pathophysiology (110) 2

Single subject analysis; Face processing; Event-related potentials; Source location; Vertex positivity (110) 449

Single trial; Gamma; Reaction time; Evoked; Event-related potential (110) 158

Single trial; Hemifield pattern-reversal visual evoked potential; Dynamic neural network; Time-varying weights; Classification (110) 1978

Single-sweep analysis; Brain oscillations; Event-related potentials; Phase-locking; Frontal alpha rhythm; EEG; Cognitive (110) 1784

Sit-to-stand; Electromyography; Motor control; Pattern of movement; Postural activity; Postural adjustment (110) 1634

Sleep depth; Auditory arousal thresholds; Selective slow wave sleep deprivation; Slow wave sleep rebound (110) 2148

Sleep EEG; CAP Detector; Microstructure Analysis; Cyclic alternating pattern (110) 585

Sleep Regulation; Electroencephalogram; Rat; Sleep; Spectral analysis (110) 869

Sleep spindles; Hippocampus; Epileptiform discharges; NREM sleep (110) 687

Sleep spindles; Matching Pursuit; Adaptive approximations; Slow wave activity (110) 2136

Sleep stages; Restless legs syndrome; Periodic leg movements in sleep; Sex; Age (110) 1168

Sleep; BECRS; Epilepsy; Spectral analysis; Spindle (110) 39

Sleep; Coherence; Cognitive state; Volume conduction; Spline-Laplacian; Dura image (110) 469

Sleep; Daytime performance; Drowsiness; Adaptive segmentation; Automatic analysis; Vigilance test; Obstructive sleep apnea syndrome; Alertness (110) 1499

Sleep; Electroencephalogram; Rat; Sleep Regulation; Spectral analysis (110) 869

Sleep; Event-related potential; Cognitive processing; Oddball paradigm (110) 53

Sleep; Event-related potentials; P300; Subject's own name; K-complex (110) 2153

Sleep; Human; Insomnia; Electroencephalography; Sedative; Nonbarbiturate; Substance withdrawal syndrome (110) 1965

Sleep; Symptomatic partial epilepsy; Spectral analysis; Spindles (110) 839

Slow cortical potentials; Epilepsy; Outcome prediction; Self-regulation (110) 683

Slow potentials; Event-related desynchronization; Stimulus anticipation; Motor preparation (110) 250

Slow wave activity; Matching Pursuit; Adaptive approximations; Sleep spindles (110) 2136

Slow wave sleep rebound; Auditory arousal thresholds; Selective slow wave sleep deprivation; Sleep depth (110) 2148

Smoking cue-reactivity; Event-related potentials; N300; P300; Tobacco addiction; Deviance detection; Automatic processing; Unpleasantness (110) 1570

Sole; Waveform; Sympathetic skin response; Palm; Habituation (110) 765

Soleus muscle; Experimental muscle pain; Stretch reflex; Motor control; Walking (110) 2033

Soleus muscle; Walking; Short and long-latency stretch reflexes; Spasticity; Motor control (110) 951

Somatic evoked magnetic field; Swine; Pig; Magnetoencephalography; Biomagnetism; Somatic evoked potential; Somatosensory cortex (110) 214

Somatic evoked potential; Swine; Pig; Magnetoencephalography; Biomagnetism; Somatic evoked magnetic field; Somatosensory cortex (110) 214

Somatosensory cortex; Consciousness; Neocortex; Cortical circuitry; Apical dendrites; Touch (110) 1987

Somatosensory cortex; Evoked magnetic fields; Somatosensory evoked magnetic field; Stroke (110) 916

Somatosensory cortex; Functional magnetic resonance imaging; Median nerve stimulation; Motor cortex; Human brain mapping; Somatosensory evoked potential (110) 47

Somatosensory cortex; High-frequency magnetic oscillations; Posterior tibial nerve; Magnetoencephalography; Time–frequency components; Multiple signal classification algorithm (110) 1585

Somatosensory cortex; High-frequency magnetic oscillations; Primary response (N20m); Inhibitory interneurons; Pyramidal neurons; Interference (110) 1445

Somatosensory cortex; Human; Somatosensory evoked magnetic fields; Index finger; Palm; Distal-proximal representation (110) 430

Somatosensory cortex; Pain; CO_2-laser evoked potentials; Intracerebral recordings; Stereo-EEG; Second somatosensory area (SII); Insula; Human brain (110) 133

Somatosensory cortex; Pig; Swine; Magnetoencephalography; Electroencephalography; Biomagnetism; Evoked potential; Evoked magnetic field; Neuromagnetism (110) 230

Somatosensory cortex; Swine; Pig; Magnetoencephalography; Biomagnetism; Somatic evoked potential; Somatic evoked magnetic field (110) 214

Somatosensory cortex; Vibration; Auditory cortex; Tactile stimulation; Magnetoencephalography; Human (110) 905

Somatosensory evoked field; Magnetoencephalography; Dipole moment; Stimulus intensity; Threshold of muscle twitch (110) 2127

Somatosensory evoked magnetic field; Evoked magnetic fields; Somatosensory cortex; Stroke (110) 916

Somatosensory evoked magnetic fields; Human; Somatosensory cortex; Index finger; Palm; Distal-proximal representation (110) 430

Somatosensory evoked potential; Central conduction; Median nerve stimulation; Onset to onset measurement; Peak to peak measurement; Multiple regression analysis (110) 2094

Somatosensory evoked potential; Functional magnetic resonance imaging; Median nerve stimulation; Somatosensory cortex; Motor cortex; Human brain mapping (110) 47

Somatosensory evoked potential; High-frequency oscillation; Parkinson's disease; Myoclonus epilepsy (110) 185

Somatosensory evoked potential; Steady state; Vibration; Mechanoreceptive afferent; Tuning function (110) 1953

Somatosensory evoked potentials; 600 Hz wavelets; Oscillatory somatosensory evoked potentials; Dipole source analysis; Primary somatosensory cortex; Thalamocortical projection; Median nerve (110) 1659

Somatosensory evoked potentials; Brainstem; Median nerve stimulation; Posterior tibial nerve stimulation (110) 1458

Somatosensory evoked potentials; EEG; Burst suppression; Anaesthesia (110) 1655

Somatosensory evoked potentials; Head injury; Motor evoked potentials; Transcranial magnetic stimulation (110) 1080

Somatosensory evoked potentials; Innocuous somatosensation; Primary somatosensory (110) 2104

Somatosensory evoked potentials; Intra-individual variability; Median nerve; Far-field; Repeat reliability (110) 1664

Somatosensory evoked potentials; Pain; Anterior cingulate cortex; Supplementary somatosensory area (110) 2107

Somatosensory evoked potentials; Parkinson's disease; Supplementary motor area; Deep brain stimulation (110) 1700

Somatosensory evoked potentials; Parkinson's disease; Thalamic stimulation (110) 146

Source localization; Epilepsy; Ictal; Frequency analysis (110) 176

Source localization; Median nerve SEP; N30; Gating; Current density reconstruction; Boundary element method (110) 1589

Source location; Face processing; Event-related potentials; Vertex positivity; Single subject analysis (110) 449

Source; Artificial; Dipole; Human; Localization (110) 106

Spasms; AR-analysis; Coherence; Ictal fast activity (110) 593

Spastic paraparesis; Magnetic stimulation; Electrical stimulation; Corticospinal tract; Motor cortex (110) 1641

Spasticity; Reciprocal inhibition; Forearm muscle; H-reflex; Test reflex size (110) 2194

Spasticity; Walking; Short and long-latency stretch reflexes; Soleus muscle; Motor control (110) 951

Spatial analysis; Continuous performance test; Electrophysiology; Evoked potentials; NoGo-anteriorisation; Microstates (110) 833

Spatial attention; Human high density EEG; Induced gamma band response; Perception; Vision (110) 2074

Spatial facilitation; Spinal cord monitoring; Corticospinal; Motor evoked responses; Scoliosis surgery (110) 720

Spatial frequency; Pattern visual evoked potentials; Steady-state; Harmonic components; Color and luminance (110) 1959

Spatial S-R compatibility tasks; Reaction time; Event-related brain potential; Error processing (110) 342

Spatial; EEG; Coherence; Synchrony (110) 115

Spatio-temporal dipole model; Magnetoencephalography/electroencephalography; Evoked responses; Multiple cognitive tasks; Common spatial subspace decomposition; Covariance matrix analysis (110) 604

Spectral analysis; Alzheimer's disease; Dementia; Age of onset; Age factors; EEG (110) 621

Spectral analysis; BECRS; Epilepsy; Sleep; Spindle (110) 39

Spectral analysis; Carotid endarterectomy; Intraoperative EEG monitoring; Quantitative EEG; Cerebral ischemia (110) 286

Spectral analysis; Electroencephalogram; Rat; Sleep; Sleep Regulation (110) 869

Spectral analysis; Symptomatic partial epilepsy; Sleep; Spindles (110) 839

Spectral profile; Quantitative electroencephalography; Alzheimer's disease (110) 1831

Spectrally complex tones; Auditory event-related potentials; Auditory sensory memory; Mismatch negativity; Neural-memory trace (110) 1388

Speech perception; Speech production; Inverse filtering; Speech synthesis; Auditory discrimination; Mismatch negativity (110) 1329

Speech production; Inverse filtering; Speech synthesis; Speech perception; Auditory discrimination; Mismatch negativity (110) 1329

Speech synthesis; Speech production; Inverse filtering; Speech perception; Auditory discrimination; Mismatch negativity (110) 1329

Speech; Transcranial magnetic stimulation; Language; Frontal lobe (110) 1073

Sphenoidal electrode; Anterior temporal electrode; Foramen ovale electrode; Epileptiform discharges; Temporal lobe epilepsy; Epilepsy surgery (110) 895

Spherical head model; Magnetoencephalography; Realistic head model; Dipole localization; Boundary element method; Inverse problem (110) 2176

Spike detection computational efficiency; Automatic EEG analysis; Wavelet analysis; Seizure detection (110) 239

Spike detection; Electroencephalography; Computer; Neural network; Clustering (110) 404

Spike evaluation; Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; ECoG; Experts; Feature extraction; Golden standard; Linear equation; Neural network; On-line detection; Pruning; Spike triggered investigation; TEMPLAS; Template matching (110) 887

Spike triggered investigation; Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; ECoG; Experts; Feature extraction; Golden standard; Linear equation; Neural network; On-line detection; Pruning; Spike evaluation; TEMPLAS; Template matching (110) 887

Spikes; Epileptiform discharges; Artificial neural networks; Self-organized learning; Fuzzy logic; Bayesian (110) 2049

Spike-wave topography; EEG; Absence seizure; Laplacian map (110) 1568

Spinal cord monitoring; Spatial facilitation; Corticospinal; Motor evoked responses; Scoliosis surgery (110) 720

Spinal cord; Evoked potential; Chronic compression; Dorsal column; Cat (110) 305

Spindle; BECRS; Epilepsy; Sleep; Spectral analysis (110) 39

Spindles; Symptomatic partial epilepsy; Sleep; Spectral analysis (110) 839

Spinocerebellar degeneration; Color and motion perception; Parkinson's disease; Parallel visual pathways; Event-related potentials (110) 1048

Spline-Laplacian; Coherence; Cognitive state; Volume conduction; Dura image; Sleep (110) 469

Standard deviation; EEG reference; EEG average reference; High resolution EEG; Evoked potentials; Signal to noise ratio (110) 1149

Standardisation; Needle electromyography; External anal sphincter muscle; Low and high threshold motor units; Motor unit potentials (110) 1488

Stationarity; Temporal lobe epilepsy; Intracranial EEG; Nonlinear analysis (110) 1726

Status epilepticus; Pentobarbital; Burst suppression; Corpus callosum (110) 1037

Steady state; Somatosensory evoked potential; Vibration; Mechanoreceptive afferent; Tuning function (110) 1953

Steady-state response; Auditory evoked potential; Middle-latency auditory evoked potential; Repetition rate; Adaptation; Rat (110) 62

Steady-state visual evoked potentials; Transient visual evoked potentials; Pattern reversal; Light-emitting diode; School children (110) 97

Steady-state; Pattern visual evoked potentials; Harmonic components; Spatial frequency; Color and luminance (110) 1959

Stereo-EEG; Pain; CO_2-laser evoked potentials; Intracerebral recordings; Somatosensory cortex; Second somatosensory area (SII); Insula; Human brain (110) 133

Stereo-electroencephalography; Amygdala; Coherence; Classification; Epilepsy network; Hippocampus; Neocortex; Temporal lobe epilepsy (110) 1741

Sternocleidomastoid muscle; Cervical dystonia; Botulinum toxin A; Quantitative electromyography (110) 1650

Stimulus anticipation; Event-related desynchronization; Slow potentials; Motor preparation (110) 250

Stimulus context; P300; P3a; P3b; Event-related potential; Auditory/visual stimuli; Three-stimulus paradigm (110) 24

Stimulus intensity; AEPs; Augmenting/reducing; T complex; Order of stimuli presentation (110) 924

Stimulus intensity; Autism; Mental retardation; Children; Late auditory evoked potentials; N1 wave; T complex; Auditory modulation (110) 1927

Stimulus intensity; Magnetoencephalography; Dipole moment; Somatosensory evoked field; Threshold of muscle twitch (110) 2127

Stimulus-response compatibility; Attention; Event-related potential; P300; Stroop; Response time (110) 367

Stochastic resonance; EEG; Event-related potentials; N100; Information processing; Reaction time; Cortical activation; Signal-to-noise ratio (110) 1193

Strength–duration time constant; Rheobase; Excitability; Voltage-dependence; Motor axons (110) 1618

Stretch reflex; Experimental muscle pain; Motor control; Walking; Soleus muscle (110) 2033

Stroke; Evoked magnetic fields; Somatosensory evoked magnetic field; Somatosensory cortex (110) 916

Stroke; Magnetic stimulation; Mapping; Recovery (110) 487

Stroop task; Frontal and parietal area of the cortex; Hemispheres; Event-related potentials; Instantaneous EEG coherence (110) 1410

Stroop; Attention; Event-related potential; P300; Stimulus-response compatibility; Response time (110) 367

Subdural electrodes; EEG; Epidural electrodes; Epilepsy (110) 419

Subject's own name; Event-related potentials; P300; Sleep; K-complex (110) 2153

Substance withdrawal syndrome; Human; Sleep; Insomnia; Electroencephalography; Sedative; Nonbarbiturate (110) 1965

Superconducting quantum interference device; Magnetic field; Electromyogram; Motor unit; Dipole (110) 284

Supplementary motor area; Parkinson's disease; Somatosensory evoked potentials; Deep brain stimulation (110) 1700

Supplementary somatosensory area; Somatosensory evoked potentials; Pain; Anterior cingulate cortex (110) 2107

Supraorbital nerve; Magnetic stimulation; Motor inhibition; Motor evoked response; First dorsal interosseus muscle; Blink reflex (110) 1090

Surface electrodes; Motor neurography; Recording area (110) 2171

Surface electromyography; Electromyography; Reliability; Muscle fatigue; Muscle torque (110) 725

Surgery; Muscle tonus; Neck muscles; Head movements; Athetosis; Nerve block (110) 1308

Swine; Pig; Magnetoencephalography; Biomagnetism; Somatic evoked potential; Somatic evoked magnetic field; Somatosensory cortex (110) 214

Swine; Pig; Magnetoencephalography; Electroencephalography; Biomagnetism; Evoked potential; Evoked magnetic field; Somatosensory cortex; Neuromagnetism (110) 230

Sympathetic skin response; Parkinson's disease; Amplitude asymmetry; Autonomic nervous system (110) 358

Sympathetic skin response; Waveform; Palm; Sole; Habituation (110) 765

Symptomatic partial epilepsy; Sleep; Spectral analysis; Spindles (110) 839

Synchrony; EEG; Coherence; Spatial (110) 115

10–20 system; Evoked potentials; EEG inverse problem; Dipole source localization; Head surface digitization; Electrode positions (110) 261

T complex; AEPs; Augmenting/reducing; Stimulus intensity; Order of stimuli presentation (110) 924

T complex; Autism; Mental retardation; Children; Late auditory evoked potentials; N1 wave; Auditory modulation; Stimulus intensity (110) 1927

Tactile stimulation; Somatosensory cortex; Vibration; Auditory cortex; Magnetoencephalography; Human (110) 905

Tapping; Centrotemporal spikes; Blinking; Trigeminal system (110) 1995

Temperature; Axonal polyneuropathy; Conduction velocity; Median nerve; Nerve conduction; Tibial nerve (110) 933

TEMPLAS; Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; ECoG; Experts; Feature extraction; Golden standard; Linear equation; Neural network; On-line detection; Pruning; Spike evaluation; Spike triggered investigation; Template matching (110) 887

Template matching; Approximation; Automatic spike detection; Biosignal analysis; Cross-correlation; ECoG; Experts; Feature extraction; Golden standard; Linear equation; Neural network; On-line detection; Pruning; Spike evaluation; Spike triggered investigation; TEMPLAS (110) 887

Temporal dispersion; Conduction block; Motor nerve conduction; Polyneuropathy; Diagnosis (110) 740

Temporal frequency; Apparent latency; Flicker stimulus; Electroretinogram; Harmonic components; Retinitis pigmentosa (110) 1554

Temporal lobe epilepsy; Amygdala; Coherence; Classification; Epilepsy network; Hippocampus; Neocortex; Stereo-electroencephalography (110) 1741

Temporal lobe epilepsy; Anterior temporal electrode; Foramen ovale electrode; Sphenoidal electrode; Epileptiform discharges; Epilepsy surgery (110) 895

Temporal lobe epilepsy; Intracranial EEG; Stationarity; Nonlinear analysis (110) 1726

Temporal lobe; Tuberous sclerosis; Auditory evoked responses; N100; Mismatch negativity; Autism (110) 1825

Temporal processing; Magnetoencephalography; Auditory evoked responses; Dipole localisation; Auditory cortex (110) 856

Tendon jerk; H-reflex; Voluntary contraction; Reproducibility (110) 1481

Test reflex size; Reciprocal inhibition; Forearm muscle; H-reflex; Spasticity (110) 2194

Textures; Visual evoked potentials; Segregation; Filling-in; Edges (110) 86

Thalamic infarction; Transcranial magnetic stimulation; Motor evoked potentials; Conditioning; Jendrassik maneuver; Facilitation (110) 499

Thalamic stimulation; Somatosensory evoked potentials; Parkinson's disease (110) 146

Thalamocortical projection; Somatosensory evoked potentials; 600 Hz wavelets; Oscillatory somatosensory evoked potentials; Dipole source analysis; Primary somatosensory cortex; Median nerve (110) 1659

Thalamus; Quantitative topographical; EEG; FDG-PET; Vascular dementia; Frequency bands (110) 615

Thalidomide; F-chronodispersion; Motor neuropathy (110) 735

Theta activity; Habituation; Orienting response; Novelty; Frontal cortex (110) 1204

Theta; Alpha; Neonate; EEG (110) 438

Thoracoabdominal aortic aneurysm surgery; Intraoperative monitoring; Motor evoked potential; Multipulse transcranial electrical stimulation; Partial neuromuscular blockade (110) 1144

Three stimulus; P300; Event-related potential; Modality; Topography (110) 463

Three-stimulus paradigm; P300; P3a; P3b; Event-related potential; Auditory/visual stimuli; Stimulus context (110) 24

Threshold of muscle twitch; Magnetoencephalography; Dipole moment; Somatosensory evoked field; Stimulus intensity (110) 2127

Tibial nerve; Axonal polyneuropathy; Conduction velocity; Median nerve; Nerve conduction; Temperature (110) 933

Time series analysis; EEG; Non-stationary processes; Seizures; Time-varying autoregressive modeling (110) 2197

Time–frequency components; Somatosensory cortex; High-frequency magnetic oscillations; Posterior tibial nerve; Magnetoencephalography; Multiple signal classification algorithm (110) 1585

Time-varying autoregressive modeling; EEG; Non-stationary processes; Seizures; Time series analysis (110) 2197

Time-varying weights; Hemifield pattern-reversal visual evoked potential; Single trial; Dynamic neural network; Classification (110) 1978

Tinnitus; Auditory evoked response; Augmenting/reducing; Serotonin; Frontal cortex; Hyperacusis (110) 666

TMS; Mapping; MEP; Model; Accuracy (110) 941

Tobacco addiction; Event-related potentials; N300; P300; Smoking cue-reactivity; Deviance detection; Automatic processing; Unpleasantness (110) 1570

Tongue; Magnetic stimulation; Hypoglossal nerve; Motor evoked potential; Lingual muscle (110) 445

Topographic mapping; Movement-related cortical potentials; Voluntary muscle relaxation; Foot movement; Negative motor phenomenon; Motor control (110) 397

Topography; P300; Event-related potential; Modality; Three stimulus (110) 463

Topography; REM sleep; EEG power spectra; Alpha rhythm (110) 632

Topography; Transcranial magnetic stimulation; Central motor conduction time; Developmental change (110) 1646

Touch; Somatosensory cortex; Consciousness; Neocortex; Cortical circuitry; Apical dendrites (110) 1987

Transcallosal inhibition; Focal transcranial magnetic cortex stimulation; Corpus callosum; Multiple sclerosis (110) 748

Transcranial magnetic stimulation; Auditory evoked potentials; Electroencephalography; Bone conduction (110) 1325

Transcranial magnetic stimulation; Auditory; Electroencephalogram; EEG; Event-related potential; ERP; Transcranial magnetic stimulation (110) 982

Transcranial magnetic stimulation; Auditory; Electroencephalogram; EEG; Event-related potential; ERP; Transcranial magnetic stimulation (110) 982

Transcranial magnetic stimulation; Central motor conduction time; Topography; Developmental change (110) 1646

Transcranial magnetic stimulation; Chronic fatigue syndrome; Fatigue; Perception of effort (110) 1883

Transcranial magnetic stimulation; Cortical myoclonus; Cortical stimulation; Cortical inhibition; Motor cortex (110) 1521

Transcranial magnetic stimulation; Corticospinal excitability; Electromyographic responses; Reading (110) 424

Transcranial magnetic stimulation; Functional magnetic resonance imaging; Hand knob; Motorcortex mapping (110) 699

Transcranial magnetic stimulation; Head injury; Motor evoked potentials; Somatosensory evoked potentials (110) 1080

Transcranial magnetic stimulation; Input-output relation; Foot motor cortex; Air stimulation; Cortical efferent zones (110) 1315

Transcranial magnetic stimulation; Motor evoked potentials; Conditioning; Jendrassik maneuver; Facilitation; Thalamic infarction (110) 499

Transcranial magnetic stimulation; Neuronal plasticity; Motor mapping; Poliomyelitis (110) 806

Transcranial magnetic stimulation; Progressive myoclonus epilepsy; Cortical rhythm; Intracortical pathway (110) 152

Transcranial magnetic stimulation; Speech; Language; Frontal lobe (110) 1073

Transient visual evoked potentials; Steady-state visual evoked potentials; Pattern reversal; Light-emitting diode; School children (110) 97

Treatment outcome; Evoked potentials; Modafinil; Narcolepsy; P300; Predictive value of tests (110) 1041

Tremor; Coherence analysis; EMG correlation analysis; Orthostatic tremor (110) 1774

Tremor; EEG; Visual evoked response; Central oscillator; Motor control (110) 2020

Trigeminal reflex; Exteroceptive suppression; Nociception; Electrical stimulation; Masticatory muscles; Motor physiology (110) 1290

Trigeminal system; Centrotemporal spikes; Blinking; Tapping (110) 1995

Tuberous sclerosis; Auditory evoked responses; N100; Mismatch negativity; Autism; Temporal lobe (110) 1825

Tuning function; Somatosensory evoked potential; Steady state; Vibration; Mechanoreceptive afferent (110) 1953

Turns/Amplitude analysis; Amplitude threshold; Interference pattern; Quantitative needle electromyography (110) 1139

Turtle brain; EEG; Epilepsy; In vitro (110) 1535

Twins; EEG development; Infant EEG; Alpha rhythm; Sensorimotor rhythm (110) 997

Twitch characteristics; Motor units; Macro-potential; Wrist extensor muscles; Amyotrophic lateral sclerosis (110) 960

Ultraviolet radiation; Visual evoked potentials; Humans; Vision (110) 379

Unpleasantness; Event-related potentials; N300; P300; Smoking cue-reactivity; Tobacco addiction; Deviance detection; Automatic processing (110) 1570

Valence; Emotion; EEG; Gamma band; Hemisphere asymmetry (110) 1913

Vascular dementia; Quantitative topographical; EEG; FDG-PET; Frequency bands; Thalamus (110) 615

Vector analysis; Visual evoked potentials; Pattern-reversal; LED goggles; Retrochiasmatic lesions (110) 390

Velocity recovery function; Needle electromyography; Motor unit action potential; Satellite potential; Muscle fiber longitudinal splitting (110) 1625

VEPs; Parvocellular; Koniocellular; Magnocellular; Chromatic contrast; Luminance contrast (110) 772

Verbal memory performance; EEG; MEG; Early activity (110) 1378

Vertex positivity; Face processing; Event-related potentials; Source location; Single subject analysis (110) 449

Vestibular visual interaction; Visual evoked potentials; Motion perception; Motion direction (110) 192

Vibration; Somatosensory cortex; Auditory cortex; Tactile stimulation; Magnetoencephalography; Human (110) 905

Vibration; Somatosensory evoked potential; Steady state; Mechanoreceptive afferent; Tuning function (110) 1953

Video telemetry; Coherence analysis; Flexor spasms; Digital EEG; Secondary bilateral synchrony (110) 374

Video-EEG monitoring; Ambulatory cassette-EEG; Intractable seizures; Psychogenic seizures (110) 1452

Vigilance test; Daytime performance; Drowsiness; Sleep; Adap-

tive segmentation; Automatic analysis; Obstructive sleep apnea syndrome; Alertness (110) 1499

Vigilance; Nap; Post-lunch dip; Daytime sleepiness; Performance; EEG alpha activity (110) 272

Vision; Human high density EEG; Induced gamma band response; Spatial attention; Perception (110) 2074

Vision; Intracranial event-related potentials; Laterality; Central sulcus; Motor (110) 1210

Vision; Visual evoked potentials; Humans; Ultraviolet radiation (110) 379

Visual ERP; N400; Automatic and controlled processes; Lexical decision task; Semantic priming (110) 813

Visual evoked potential; Interhemispheric transfer; Corpus callosum; Frequency analysis; Healthy subject (110) 71

Visual evoked potentials; Humans; Ultraviolet radiation; Vision (110) 379

Visual evoked potentials; Motion perception; Motion direction; Vestibular visual interaction (110) 192

Visual evoked potentials; Optic tract; Near field potentials; Pallidotomy; Band-pass filter; Potentials (110) 92

Visual evoked potentials; Textures; Segregation; Filling-in; Edges (110) 86

Visual evoked potentials; Vector analysis; Pattern-reversal; LED goggles; Retrochiasmatic lesions (110) 390

Visual evoked response; Tremor; EEG; Central oscillator; Motor control (110) 2020

Visual spatial attention; Auditory spatial attention; Cross-modal attention; Event-related brain potential (110) 1252

Visual stimuli; Magnetoencephalography; Interaction; Auditory stimulus; Attention (110) 295

Visual-evoked potential; Retinotopy; Retinotopic map; Multi-electrode recording; Dipole source localization; M-sequence; White noise (110) 1793

Visual-spatial attention; Event-related potential; Selection negativity; Kinetic form; Low resolution electromagnetic tomography (110) 329

Visuomotor task; Oscillation; Gamma; Electrocorticogram; Sensorimotor cortex; Human (110) 524

Voltage-dependence; Strength–duration time constant; Rheobase; Excitability; Motor axons (110) 1618

Volume conduction; Coherence; Cognitive state; Spline-Laplacian; Dura image; Sleep (110) 469

Volume conduction; Intracellular action potential; Single muscle fiber; Needle electromyography; Computer modeling (110) 166

Volume conduction; Motor unit action potential; Motor unit; Intracellular action potential; Far-field potential (110) 1876

Voluntary contraction; Tendon jerk; H-reflex; Reproducibility (110) 1481

Voluntary movement; Bereitschaftspotential; Negative slope; Cerebellar dentate nucleus (110) 126

Voluntary movement; EEG classification; Mu rhythm; Sensorimotor cortex; Human; Event-related desynchronization (110) 787

Voluntary movement; Event-related desynchronization; Event-related synchronization; Sensorimotor function; Brain oscillations (110) 1842

Voluntary muscle relaxation; Movement-related cortical potentials; Foot movement; Negative motor phenomenon; Motor control; Topographic mapping (110) 397

Wakefulness; Age; Arousal systems; Brain; Electroencephalography; Evoked potentials; Latency; Sex (110) 1427

Walking; Experimental muscle pain; Stretch reflex; Motor control; Soleus muscle (110) 2033

Walking; Short and long-latency stretch reflexes; Spasticity; Soleus muscle; Motor control (110) 951

Waveform; Sympathetic skin response; Palm; Sole; Habituation (110) 765

Wavelet analysis; Automatic EEG analysis; Seizure detection; Spike detection computational efficiency (110) 239

Wavelet transform; Binding; Evoked potentials; Illusory contours; Kanizsa figures; Phase locking (110) 636

Wavelet; Evoked potential; Event-related potential; Alpha; EEG (110) 643

White noise; Retinotopy; Retinotopic map; Visual-evoked potential; Multi-electrode recording; Dipole source localization; M-sequence (110) 1793

Wrist extensor muscles; Motor units; Twitch characteristics; Macro-potential; Amyotrophic lateral sclerosis (110) 960

Writer's cramp; CNV; Motor subroutine; Dystonia; Pathophysiology (110) 508
